

High School Modern World History Framework

Introduction

The Code of Maryland Regulations (COMAR) 13A.04.08.01, Requirements for Social Studies Instructional Programs for Grades Prekindergarten – 12 states that, “each local education agency shall provide in public schools an instructional program in social studies each year for all students in grades prekindergarten – 8; and offer in public schools a social studies program in grades 9 – 12 which enables students to meet graduation requirements and to select social studies electives.”

State Frameworks are developed by the Maryland State Department of Education (MSDE) to support local education agencies in providing high-quality instructional programs in social studies. State Frameworks are defined as supporting documents and provide guidance for implementing the State Standards in Social Studies which are reviewed and adopted by the Maryland State Board of Education every eight years. State Frameworks also provide consistency in learning expectations for students in social studies programs across the twenty-four local education agencies as local curriculum is developed and adopted using these documents as a foundation.

MSDE shall update the State Frameworks in Social Studies in the manner and time the State Superintendent of Schools determines is necessary to ensure alignment with best-in-class, research-based practices. Tenure and stability of State Frameworks affords local education agencies the necessary time to procure supporting instructional materials, provide professional development, and to measure student growth within the program. Educators, practitioners, and experts who participate in writing workgroups for State Frameworks represent the diversity of stakeholders across Maryland. State Frameworks in high school social studies were developed, reviewed, and revised by teams of Maryland educators and practitioners, including local education agency content curriculum specialists, classroom teachers, accessibility staff, and academic researchers and experts in close collaboration with MSDE.

The Modern World History Social Studies Framework was released in January 2018, updated in November 2020.

Course Overview

Modern World History focuses on developing students' understanding of world history from approximately 1300 to the present. In world history students interpret evidence and identify significant trends in order to understand major developments across the globe. Students will explore how humans have thought, behaved and interacted across the ages in order to develop an understanding of global patterns of change and continuity. Students of world history study specific people, events, and ideas by situating them in global, interregional, and regional contexts. Organizationally, world history requires students to shift between global, interregional, and regional spatial scales in order to emphasize interactions between different scales of historical study and to identify connections across time and geography. The spatial scales incorporated in this framework are:

- **Global Focus:** Concentrates on large-scale patterns occurring in several areas of the globe.
- **Interregional Focus:** Concentration on patterns and comparisons linking multiple regions across geography within a particular era.
- **Regional Focus:** Concentration on local, state, national or regional events within a particular era with significance to global and/or interregional events.

Student investigation of world history is further structured by the use of overarching historical themes that link the four units of the course. While examining content, students are tracing:

- Interaction between humans and the environment;
- Development and interactions of cultures;
- State building, expansion and conflict;
- Creation, expansion, and interaction of economic systems; and
- Development and transformation of social structures.

To help students in acquiring these understandings, the content of the framework is structured by the following six state social studies standards:

STANDARD	DESCRIPTION OF STANDARD
Standard 1.0: Civics	Students shall inquire about the historical development of the fundamental concepts and processes of authority, power, and influence with particular emphasis on civic reasoning in order to become informed, responsible citizens, engage in the political process, and contribute to society.

STANDARD	DESCRIPTION OF STANDARD
Standard 2.0: Peoples of the Nations and World	Students shall inquire about the people of the United States and the world using a historically grounded, multidisciplinary approach in order to recognize multiple narratives and acknowledge the diversity and commonality of the human experience.
Standard 3.0: Geography	Students shall inquire about the role of culture, technology, and the environment in the location, distribution, and impact of human activities using geographic tools and spatial thinking in order to demonstrate a significance of place.
Standard 4.0: Economics	Students will inquire about decisions made by individuals and groups using economic reasoning in order to understand the historical development and current status of economic principles, institutions, and processes needed to be effective citizens, consumers, and workers participating in local communities, the nation, and the world.
Standard 5.0: History	Students will inquire about significant events, ideas, beliefs, and themes to identify patterns, trends, and to analyze how individuals and societies have changed over time to make connections to the present in their communities, Maryland, the United States, and the world.
Standard 6.0: Skills and Processes	Students will inquire about civics, geography, economics, history, and people and nations of the world using disciplinary literacy skills and processes to critically evaluate content through a variety of source materials across disciplines and use reading, writing, and other forms of communication to develop, defend, and critique arguments in order to take informed action.

Standard 6.0

The four dimensions of The Inquiry Arc are reflected in Maryland’s Standard 6.0:

1. **Developing Questions & Planning Inquiries** – constructing compelling and supporting questions, planning inquiries, and determining helpful sources.
2. **Applying Disciplinary Concepts & Tools** – applying the disciplinary concepts and tools of civics, geography, economics, and history.
3. **Evaluating Sources & Using Evidence** – evaluating sources, identifying credible, relevant information contained in sources, using evidence to support and develop claims.
4. **Communicating and Critiquing Conclusions & Taking Informed Action** – communicating and presenting claims, critiquing claims, and identifying ways to address problems in their communities.

Throughout the course, students should be employing the social studies skills and processes delineated in the 6.0 Skills and Processes standard. Organizing these skills is the Inquiry Arc which provides a structure to facilitate effective instruction in social studies.

Sample Unit Template

Unit Enduring Understanding: An **enduring understanding** is the overarching, conceptual guideline for the unit. Enduring understandings explain why this unit is important and connect important concepts and processes to history and the world today.

Unit Question: A **unit question** connects the big ideas in the enduring understandings and essential questions to the period of study. Everything in the unit contributes to answering this question.
