Use the following procedures for evaluating household income on free and reduced-price meal applications when comparing to the Income Eligibility Guidelines (IEGs):

- If a household has only one income source, or if all sources are the same frequency, do not use conversion factors. Compare the income, or the sum of incomes, to the published IEG for the appropriate frequency and household size to make the eligibility determination.
- If a household reports income sources at more than one frequency, annualize all income by multiplying weekly income by 52, income received every two weeks by 26, income received twice a month by 24, and income received monthly by 12. Do NOT round the values resulting from each conversion. Sum all the unrounded converted values and compare the unrounded total to the IEGs for annual income for the appropriate household size.
