## Background

---

The Annotated Code of Maryland Education Article § 7-1104 requires the Maryland State Department of Education (MSDE) report to the General Assembly annually (on or before December 1 each year) on the findings reported to MSDE by public agencies (e.g., local education agencies, the Maryland School for the Deaf, the Maryland School for the Blind) and nonpublic schools on physical restraint and seclusion incidents for the prior school year and recommendations by MSDE.

The legislation specifically requires the collection of the following data:

1. The number of physical restraint incidents, disaggregated by the student's jurisdiction, disability, race, gender, age, and type of placement;
2. The number of physical restraint incidents for each student who had at least one physical restraint or seclusion incident, disaggregated by jurisdiction, disability, race, gender, age, and type of placement;
3. For nonpublic schools, the number of seclusion incidents, disaggregated by the student's jurisdiction, disability, race, gender, and age; and
4. For nonpublic schools, the number of seclusion incidents for each student who had at least one seclusion incident, disaggregated by jurisdiction, disability, race, gender, and age.

Additionally, the legislation requires public agencies and nonpublic schools to report on:

1. The professional development provided to designated school personnel related to positive behavioral interventions, strategies, and supports and trauma-informed interventions for the prior school year;
2. For nonpublic schools, the policy changes made to further reduce the use of seclusion incidents during the prior school year;
3. The policy changes or new professional development opportunities designed to further increase positive behavioral interventions and reduce physical restraint or seclusion incidents in the upcoming school year; and
4. For nonpublic schools, results of observations and reviews of seclusion rooms and reviews of training plans for the use of seclusion.

During the 2022 legislative session, the Maryland General Assembly passed House Bill 1255 “Physical Restraint and Seclusion – Limitations, Reporting, and Training” which amended and expanded the law governing restraint and seclusion. The amended legislation for the Annotated Code of Maryland Education Article § 7-1101 defines physical restraint as “a personal restriction that immobilizes or reduces the ability of a student to move the student’s torso, arms, legs, or head freely during school hours.”

Physical restraint does not include:

1. Briefly holding a student to calm or comfort the student;
2. Holding a student's hand or arm to escort the student safely from one area to another;
3. Moving a disruptive student who is unwilling to leave the area if other methods such as counseling have been unsuccessful; or

4. Breaking up a fight in the school building or on school grounds.

Except as provided in §A(1)(b), under the Code of Maryland Regulations (COMAR) 13A.08.04.05, “the use of physical restraint is prohibited in public agencies and nonpublic schools until there is an emergency situation and physical restraint is necessary to protect a student or other person from imminent, serious, physical harm after other less intrusive, nonphysical interventions have failed or been determined inappropriate.”

COMAR 13A.08.04.02 defines seclusion as “the involuntary confinement of a student alone in a room or area from which the student is physically prevented from leaving. Seclusion does not include a timeout, which is a behavior management technique that is part of an approved program, involves the monitored separation of the student in a non-locked setting, and is implemented for the purpose of calming.”

In accordance with the Annotated Code of Maryland Education Article § 7-1102, effective July 1, 2022, the use of seclusion is banned in all public agencies. This report reflects the second year that seclusion is prohibited in public agencies. A nonpublic school may not use seclusion as a behavioral health intervention unless seclusion is necessary to protect the student or another individual from imminent serious physical harm or other less intrusive interventions have failed or been determined inappropriate for the student.

As with previous reports, the 2024 report describes the data collection process, provides summary data for the 2023-2024 school year based on public agency and nonpublic school responses, and outlines findings and recommendations based on an analysis of the information gathered. The report contains information on total incidents of physical restraint and seclusion disaggregated by disability category, race, gender, age, and type of placement. Implementation of the Annotated Code of Maryland Education Article § 7-1104 required MSDE to collect student level data beginning with the 2021-2022 school year. To meet the requirement, this report further contains information on unduplicated student incident counts of physical restraint and seclusion disaggregated by disability category, race, gender, age, and type of placement. The 2022 report reflected the first year that data was disaggregated at a student level.

To ensure accuracy and understanding of the requested data, MSDE continued to provide technical assistance to all public agencies and nonpublic schools throughout the 2023-2024 school year regarding the understanding of the statutes surrounding the use of restraint and seclusion and definitions of the use of restraint and seclusion. MSDE additionally provided technical assistance sessions on the data collection including what constitutes a new incident of restraint and reporting individual incidents separately as opposed to reporting on the entire behavior event, which may include multiple incidents of restraint.

Information gathered for this report is organized into three sections.

- Section I contains all data related to incidents of physical restraint.
- Section II contains all data related to incidents of seclusion.
- Section III consists of information related to the review of seclusion rooms, seclusion training plans, and professional learning experiences.

## **UNIQUE STUDENT COUNT**

All students in Maryland have a ten-digit state assigned student identification (SASID) number, which is a unique student identifier. Student level data reported to MSDE must include a SASID number for each student. As part of the Physical Restraint and Seclusion: Data Collection, Findings, and Considerations report reflecting data from July 1, 2023, through June 30, 2024, students are not duplicated within a category but may be reported across multiple categories.

## **DATA SUPPRESSION**

The Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. §1232g, 34 CFR Part 99, is a federal law that protects the privacy of student education records. Under FERPA, states are responsible for protecting students' personally identifiable information (PII) from disclosure when reporting. Even data that are reported in aggregate have the potential to disclose PII.

Data suppression is a disclosure avoidance method that is used to protect the identities, privacy, and personal information of individuals. To abide by the regulation outlined in FERPA and protect student's PII, MSDE applies suppression rules to aggregated student data that is connected to student education data and outcomes.

MSDE applies a minimum N-size when reporting restraint and seclusion data. Minimum N-size for reporting is when data must have a sufficient number of students for the data to be reported.

### **Public Agency Data Suppression Rules**

Data are suppressed for any student group where the total enrollment for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*). Enrollment numbers for public agencies were obtained from the Division of Assessment, Accountability and Performance Reporting and the Division of Early Intervention and Special Education Services.

### **Nonpublic School Data Suppression Rules**

There is no mandate that nonpublic schools report student group enrollment data to MSDE. Without available student group enrollment data, restraint and seclusion data for nonpublic schools will be suppressed for any student group based on the number of incidents. Data will be suppressed for any student group when the total number of incidents for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

## Data Collection

---

To obtain the specific data required under the Annotated Code of Maryland Education Article §7-1104 for the 2024 Physical Restraint and Seclusion Report: Data Collection, Findings, and Recommendations, covering the 2023-2024 school year, MSDE required data be communicated using two different methods:

1. Incident data was entered into a data collection tool and uploaded to the secure file transfer system MOVEit (Sections I and II); and
2. Information regarding the observation of seclusion rooms, review of seclusion training plans, and professional learning experiences were captured using an electronic survey (Section III).

Each incident of physical restraint and seclusion that occurred during the 2023-2024 school year was entered as an individual data field using the following required information.

- School Year
- School Identifying Information:
  - Public Agency/Nonpublic Number – Name
  - School Number – Name
- Student Identifying Information:
  - Local Student ID
  - State Assigned Student ID (SASID)
  - Date of Birth
  - Gender
  - Hispanic/Latino Ethnicity
  - Race
  - Grade
  - Special Education Indicator
  - Special Education Disability Code
  - Special Education Placement Type/Least Restrictive Environment (LRE)
  - Section 504 Plan
  - English Learner (EL)
- Physical Restraint Specific Data:
  - Date of Physical Restraint Incident
  - Was the period of physical restraint 30 minutes or less?
- Seclusion Specific Data:
  - Date of Seclusion Incident
  - Was the period of seclusion 30 minutes or less?

Data regarding the review of seclusion rooms, seclusion training plans, and professional learning experiences that occurred during the 2023-2024 school year were captured using a survey to gather the following information.

- Seclusion Room Observations and Seclusion Training Plan Review (nonpublic schools only)
  - Name and title of the individual who observed the seclusion room;

- Results of the observation of the seclusion room;
- Name and title of the individual who reviewed the seclusion training plan;
- Results of the review of the seclusion training plan; and
- Explanation of why there was no observation of the seclusion room or review of the seclusion training plan, if those did not occur during the 2023-2024 school year.
- Professional Learning Experiences Related to Positive Behavioral Interventions, Strategies, and Supports and Trauma-Informed Interventions
  - Hours of professional learning experience trainings that were required for personnel to be considered authorized to perform restraint and/or seclusion;
  - Content of the professional learning experience trainings provided to school personnel who are considered authorized to perform restraint and/or seclusion;
  - Crisis intervention/managements programs utilized in the school or district;
  - Average number of unique professional learning experience trainings related to restraint and/or seclusion required for school personnel who were considered authorized to perform restraint and/or seclusion;
  - Average durations for each professional learning experience trainings related to restraint and/or seclusion;
  - Position(s) held by individuals who conducted the professional learning experience event(s) in the use of restraints and/or seclusions;
  - Position(s) held by individuals who received professional learning experience trainings in the use of restraints and/or seclusions; and
  - The percentage of staff who received professional learning experiences related to physical restraint and/or seclusion.
- Policy Changes and Updates to Professional Development
  - For nonpublic schools, policy changes made to further reduce the use of seclusion incidents during the 2023-2024 school year; and
  - Policy changes or new professional development opportunities designed to further increase positive behavioral interventions and reduce physical restraint or seclusion incidents for the 2024-2025 school year.

# Findings

## SECTION I: PHYSICAL RESTRAINT INCIDENTS

### Physical Restraint Public Agencies

Public agencies include all 24 local education agencies (LEA), the SEED School of Maryland, Maryland School for the Blind, and Maryland School for the Deaf (Columbia and Frederick campuses combined). Physical restraint data for public agencies reported during the 2023-2024 school year are provided in Tables 1 through 11 of this report.

### Total Number of Physical Restraint Incidents by Public Agency

For the 2023-2024 school year, there was a total of 3,553 reported physical restraint incidents occurring with 1,069 students in public agency schools. Table 1 shows the number of incidents of physical restraint and number of unduplicated students within each public agency. The total number of students for each public agency is unique, however, students may be counted in more than one public agency.

Data are suppressed for any student group where the total enrollment for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

### Physical Restraint Incidents for Students by Disability Category, Public Agencies

Table 2 shows the number of reported physical restraint incidents for students during the 2023-2024 school year, disaggregated by disability category, for all public agencies.

Table 3 reflects unduplicated students that were reported to have been physically restrained during the 2023-2024 school year, disaggregated by disability category, for all public agencies. Within each disability category and public agency, the student count is unique. However, students may be counted in more than one disability category and public agency.

Data are suppressed for any student group where the total enrollment for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

### Physical Restraint Incidents for Students by Age, Public Agencies

Table 6 shows the number of reported physical restraint incidents for students during the 2023-2024 school year, disaggregated by age, for all public agencies.

Table 7 reflects unduplicated students that were reported to have been physically restrained during the 2023-2024 school year, disaggregated by age, for all public agencies. Within each age group and public agency, the student count is unique. However, students may be counted in more than one age group and public agency.

Data are suppressed for any student group where the total enrollment for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

#### Physical Restraint Incidents for Students by Placement Type, Public Agencies

Table 8 shows the number of reported physical restraint incidents for students during the 2023-2024 school year, disaggregated by type of placement (general education or special education), for all public agencies.

Table 9 reflects the number of reported physical restraint incidents for students disaggregated by the LRE category.

Table 10 shows the unduplicated number of students to have been physically restrained during the 2023-2024 school year, disaggregated by type of placement (general education or special education), for all public agencies. Within each placement category and public agency, the student count is unique. However, students may be counted in more than one placement category and public agency.

Table 11 reflects unduplicated students that were reported to have been physically restrained during the 2023-2024 school year, disaggregated by the LRE category, for all public agencies. Within each LRE category and public agency, the student count is unique. However, students may be counted in more than one LRE category and public agency.

Data are suppressed for any student group where the total enrollment for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

### Physical Restraint Nonpublic Schools

Publicly funded Type I, II, and III nonpublic schools provide instruction for students in general and special education. There were a total of 69 nonpublic schools in Maryland during the 2023-2024 school year. RICA-Baltimore (Department of Health) is not a nonpublic school, however, for the purposes of this data collection only, RICA-Baltimore (Department of Health) is included in the results for nonpublic schools. Nonpublic schools reported data on the use of restraint and/or seclusion.

Eleven of the nonpublic schools indicated they have a statement in their behavior management policies and procedures that they do not practice physical restraint and reported no incidences of restraint during the 2023-2024 school year. Those schools are Baltimore Lab School, Chelsea School, High Road Academy, JEWELS School, The Harbour School at Annapolis, The Harbour School at Baltimore, The Pathways School - Anne Arundel, The Pathways School – Catonsville, The Pathways School – Edgewood, The Summit School, and VisionQuest MorningStar Youth Academy. These schools are not included in data tables regarding the use of restraint.

Physical restraint data for nonpublic schools reported during the 2023-2024 school year are provided in tables 12 through 23 of this report.

### Total Number of Physical Restraint by Nonpublic School

For the 2023-2024 school year, there was a total of 3,013 reported physical restraint incidents occurring with 579 students in nonpublic schools. Table 12 shows the number of incidents of physical restraint and number of unduplicated students within each nonpublic schools. The total number of students for each nonpublic school is unique, however, students may be counted in more than one nonpublic school.

Data are suppressed for any student group when the total number of incidents for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

**Physical Restraint Incidents for Students by Disability Category, Nonpublic Schools**

Table 13 shows the number of reported physical restraint incidents for students during the 2023-2024 school year, disaggregated by disability category, for nonpublic schools.

Table 14 reflects unduplicated students that were reported to have been physically restrained during the 2023-2024 school year, disaggregated by disability category, for nonpublic schools.

Within each disability category and nonpublic school, the student count is unique. However, students may be counted in more than one disability and nonpublic school. Data are suppressed for any student group when the total number of incidents for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

### Physical Restraint Incidents for Students by Placement Type, Nonpublic Schools

Table 19 shows the number of reported physical restraint incidents for students during the 2023-2024 school year, disaggregated by type of placement (general education or special education), for nonpublic schools.

Table 20 reflects the number of reported physical restraint incidents for nonpublic school students during the 2023-2024 school year, disaggregated by the LRE category.

Table 21 shows the unduplicated number of students to have been physically restrained during the 2023-2024 school year, disaggregated by type of placement (general education or special education), for nonpublic schools. Within each placement category and nonpublic school, the student count is unique. However, students may be counted in more than one placement category and nonpublic school.

Table 22 reflects unduplicated students that were reported to have been physically restrained during the 2023-2024 school year, disaggregated by the LRE category, for nonpublic schools. Within each LRE category and nonpublic school, the student count is unique. However, students may be counted in more than one LRE category and nonpublic school.

Data are suppressed for any student group when the total number of incidents for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

## SECTION II: SECLUSION INCIDENTS

The Annotated Code of Maryland Education Article § 7-1102 prohibited the use of seclusion in Maryland in public agency schools as of July 1, 2022. This report reflects the first year of seclusion being banned in public agencies. A nonpublic school may not use seclusion as a behavioral health intervention unless seclusion is necessary to protect the student or another individual from imminent serious physical harm or other less intrusive interventions have failed or been determined inappropriate for the student.

One seclusion incident occurring in public school settings was reported to MSDE for one student in one LEA. The LEA conducted a thorough investigation of the incident and shared the details of that incident with MSDE. MSDE assisted the LEA in the identification of root causes and supported the LEA in the development of an implementation plan to reinforce appropriate understanding and actions to prevent the future use of seclusion within the jurisdiction. Finally, the LEA reported to MSDE actions taken at the local level to inform and educate involved staff on what constitutes seclusion and alternate response options.

### Seclusion Nonpublic Schools

Thirty-two of the nonpublic schools indicated they have a statement in the behavior management policies and procedures that they do not practice seclusion and reported no incidences of seclusion during the 2023-2024 school year. Those schools are Baltimore Lab School, Chelsea School, Community School of Maryland, High Road Academy, High Road Academy of Prince George's County, High Road Lower School of Prince George's County, High Road Upper School of Prince George's County, JEWELS Schools, Marcia D. Smith School, New Directions Academy, Sheppard Pratt School - Type II Program at Millersville Elementary School, Sheppard Pratt School - Type II Program at Severn River Middle School, Sheppard Pratt School - Type II Program at Severna Park High School, Sheppard Pratt School in Frederick, Shorehaven School, The Baltimore Academy, The Harbour School at Annapolis, The Harbour School at Baltimore, The Ivymount School, The Katherine Thomas School, The Pathways School - Anne Arundel, The Pathways School – Catonsville, The Pathways School – Edgewood, The Ridge School of Montgomery County, The Shafer Center for Early Intervention, The Strawbridge School, The Summit School, Villa Maria School, Villa Maria School Type III Diagnostic, VisionQuest Morning Star Youth Academy, Woodbourne School, and Youth in Transition School. These schools are not included in data tables regarding the use of seclusion.

Seclusion data for nonpublic schools reported during the 2023-2024 school year are provided in Tables 24 through 34 of this report.

### Total Number of Seclusions by Nonpublic School

For the 2023-2024 school year, there was a total of 1,103 reported seclusion incidents occurring with 177 students in nonpublic schools. Table 23 shows the number of incidents of seclusion and number of unduplicated students within each nonpublic school. The total number of students for each nonpublic school is unique, however, students may be counted in more than one nonpublic school.

Data are suppressed for any student group when the total number of incidents for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

**Seclusion Incidents for Students by Disability Category, Nonpublic Schools**

Table 24 shows the number of reported seclusion incidents for students during the 2023-2024 school year, disaggregated by disability category, for nonpublic schools.

Table 25 reflects unduplicated students that were reported to have been secluded during the 2023-2024 school year, disaggregated by disability category, for nonpublic schools. Within each disability category and nonpublic school, the student count is unique. However, students may be counted in more than one disability category and nonpublic school.

Data are suppressed for any student group when the total number of incidents for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

### Seclusion Incidents for Students by Type of Placement, Nonpublic Schools

Table 30 shows the number of reported seclusion incidents for students during the 2023-2024 school year, disaggregated by type of placement (general education or special education), for nonpublic schools.

Table 31 reflects the number of reported seclusion incidents for students disaggregated by the LRE category.

Table 32 shows the unduplicated number of students to have been secluded during the 2023-2024 school year, disaggregated by type of placement (general education or special education), for nonpublic schools. Within each placement category and nonpublic school, the student count is unique. However, students may be counted in more than one placement category and nonpublic school.

Table 33 reflects unduplicated students that were reported to have been physically restrained during the 2023-2024 school year, disaggregated by the LRE category, for all public agencies. Within each LRE category and nonpublic school, the student count is unique. However, students may be counted in more than one LRE category and nonpublic school.

Data are suppressed for any student group when the total number of incidents for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

### **SECTION III: SURVEY RESULTS**

To obtain the specific data required under the Annotated Code of Maryland Education Article §7-1104 for the Physical Restraint and Seclusion Report: Data Collection, Findings, and Recommendations covering the 2023-2024 school year, MSDE required data be communicated using two different methods. Information regarding observation of seclusion rooms, review of seclusion training plans, professional learning experiences, and policy changes were captured using an electronic survey.

#### **Observation of Seclusion Rooms and Review of Seclusion Training Plans**

The survey was configured so that only nonpublic schools who allow for the use of seclusion as a practice were asked to respond to items related to the use of seclusion. Nonpublic schools that have a statement in their behavior management policies and procedures indicating that they do not practice seclusion in their schools were not required to answer questions regarding observation of seclusion rooms and review of seclusion training plans. Twenty-nine nonpublic schools responded to survey questions about seclusion. Survey respondents that used seclusion were asked to report on whether someone from their school had observed their school's seclusion room(s) and reviewed their school's training plan(s) for the use of seclusion during the 2023-2024 school year. All schools reported that their seclusion room had been observed and their training plans had been reviewed. Respondents indicated that their seclusions rooms and training plans were found to meet all COMAR and other regulatory requirements, including school policies. Many commented on the lack of locks on doors and fixtures in the room, as well as other safety components. The titles of individuals who observed seclusion rooms and reviewed training plans include administrator, education director, principal, and director of behavioral services.

#### **Professional Learning Experiences Provided by Public Agencies and Nonpublic Schools**

Survey respondents were asked to report on professional learning experience training relating to physical restraint and seclusion provided to school personnel during the 2023-2024 school year. All public agencies and nonpublic schools responded to survey questions about professional learning experiences. The following section of the report summarizes the professional learning experience training related to physical restraint delivered by public agencies and professional learning experience training related to physical restraint and seclusion delivered by nonpublic schools during the 2023-2024 school year.

#### **Number of Hours of Professional Learning Experience Training Required**

Survey responses indicate the number of professional learning experience hours required for authorization to perform physical restraint and/or seclusion varied across public agencies and nonpublic schools. For individuals being trained for the first time, the number of training hours required by public agencies ranged from six to 42 hours, while for individuals undergoing reauthorization training, the number of training

hours required by public agencies ranged from four to 34 hours. The responses for nonpublic schools ranged from 16 to 48 training hours for initial training and 10 to 28 hours for reauthorization.

### Average Number of Professional Learning Experience Events Provided to Personnel

Survey responses indicate the average number of professional learning experience events provided to school personnel who were authorized to perform physical restraint and/or seclusion varied across public agencies and nonpublic schools, ranging from one to more than six training events.

Figure 1 shows the average number of professional learning experience events provided to public agency school personnel during the 2023-2024 school year. The most common response was two professional learning experience events, with one event being common as well.

**Figure 1: Average Number of Professional Learning Experience Events Provided to Personnel, Public Agencies**

Figure 2 shows the average number of professional learning experience events provided to nonpublic school personnel during the 2023-2024 school year. Four of the nonpublic schools did not answer this question. The most commonly reported response was having three professional learning experience events, although many schools also provided six or more events.

**Figure 2: Average Number of Professional Learning Experience Events Provided to Personnel, Nonpublic Schools**

### Average Number of Hours of Individual Professional Learning Experience Events

Survey responses indicate the average number of hours per professional learning experience events provided to school personnel who were authorized to perform physical restraint and/or seclusion varied across public agencies and nonpublic schools, ranging from one to more than six hours.

Figure 3 shows the average number of hours of professional learning experience events provided to public agency school personnel during the 2023-2024 school year. Half the respondents reported an average of six or more hours per event.

**Figure 3: Average Number of Hours of Professional Learning Experience Events Provided to Personnel, Public Agencies**

Figure 4 shows the average number of hours of professional learning experience events provided to nonpublic school personnel during the 2023-2024 school year. Four of the nonpublic schools did not answer this question. The most common response was six or more hours per event and 4 hours per event, both with approximately a quarter of the respondents selecting those options.

**Figure 4: Average Number of Hours of Professional Learning Experience Events Provided to Personnel, Nonpublic Schools**

### Content of Professional Learning Experience Training

Figure 5 shows the type of trainings public agencies provided to school personnel during the 2023-2024 school year. This figure represents the percentage of public agencies providing training on that specific topic. The most common topic was crisis intervention or management training.

**Figure 5: Content of Professional Learning Experiences, Public Agencies**

Figure 6 shows the type of trainings nonpublic schools provided to school personnel during the 2023-2024 school year. This figure represents the percentage of nonpublic schools providing training on that specific topic. The most common topic was Positive Behavior Interventions, Strategies, and Supports.

**Figure 6: Content of Professional Learning Experiences, Nonpublic Schools**

### Crisis Intervention/Management Program Utilized

Figure 7 shows the types of crisis intervention or crisis management programs that were utilized by public agencies during the 2023-2024 school year. This figure represents the percentage of public agencies utilizing that crisis intervention program. The most commonly used crisis intervention program was Crisis Prevention Institute, Inc. (CPI).

**Figure 7: Crisis Intervention/Management Program, Public Agencies**

Figure 8 shows the types of crisis intervention or crisis management programs that were utilized by nonpublic schools during the 2023-2024 school year. This figure represents the percentage of nonpublic schools utilizing that crisis intervention program. The most commonly used crisis intervention program was Crisis Prevention Institute, Inc. (CPI).

**Figure 8: Crisis Intervention/Management Program, Nonpublic Schools**

**Positions Held by Individuals Conducting Professional Learning Experience Training Events**

Figure 9 shows the positions held by those individuals conducting professional learning experience training events in public agencies during the 2023-2024 school year. Profession learning was most commonly led by behavior therapists or system administrators.

**Figure 9: Positions Held by Individuals Conducting Professional Learning Experience Training Events, Public Agencies**

Figure 10 shows the positions held by those individuals conducting professional learning experience training events in nonpublic schools during the 2023-2024 school year. Professional learning was most often led by a school administrator.

**Figure 10: Positions Held by Individuals Conducting Professional Learning Experience Training Events, Nonpublic Schools**

### Positions Held by School Receiving Professional Learning Experience Training

Figure 11 shows the positions held by those individuals receiving professional learning experience training for restraint in public agencies during the 2023-2024 school year. School administrators, teachers, counselors, psychologists, and teaching assistants were the most commonly reported positions attending professional learning events.

**Figure 11: Positions Held by Individuals Receiving Professional Learning Experience Training, Public Agencies**

Figure 12 shows the positions held by those individuals receiving professional learning experience training for restraint and/or seclusion in nonpublic schools during the 2023-2024 school year. School administrators, special education teachers, and teaching assistants were the most commonly reported positions attending professional learning events.

**Figure 12: Positions Held by Individuals Receiving Professional Learning Experience Training Events, Nonpublic Schools**

### Percentage of Staff who Received Professional Learning Experience Training

Survey responses indicate the percentage of school personnel who were authorized to perform physical restraint and/or seclusion varied across public agencies and nonpublic schools. Figure 13 shows the percentage of staff who received professional learning experience training in public agencies during the 2023-2024 school year. For public agencies, the percentage of school personnel who received professional learning experiences related to restraint was typically 0-20%.

**Figure 13: Percentage of Staff who Received Professional Learning Experience Training, Public Agencies**

For nonpublic schools, the percentage of school personnel who received professional learning experiences was typically 81-100%. Figure 14 shows the percentage of school personnel who received professional learning experiences related to restraint and/or seclusion in nonpublic schools during the 2023-2024 school year. Most nonpublic schools reported that 81-100% of their staff attend professional learning experiences.

**Figure 14: Percentage of Staff who Received Professional Learning Experience Training, Nonpublic Schools**

## Summary

---

**This report presents data collected on physical restraint and seclusion for public agencies and nonpublic schools in Maryland during the 2023-2024 school year. After reviewing the data, the following comments are provided for consideration.**

### **PUBLIC AGENCIES**

For the 2023-2024 school year, there were a total of 3,553 reported physical restraint incidents occurring with 1069 students in public agency schools. There was a decrease in the total number of reported physical restraint incidents in public agencies from the 2022-2023 school year (5,504) and a decrease in the number of unduplicated students from the 2022-2023 school year (1087).

### **Trends and Patterns in Behavioral Interventions and Professional Learning Experiences**

- The most common average number of professional learning events regarding the use of restraint provided to school personnel was two events, which is an increase from last year.
- These professional learning events were six or more hours in length.
- Public agencies are commonly providing professional learning events in the areas of crisis intervention management, system level policies related to restraint, positive preventative behavioral interventions, CPR/First Aid, and trauma informed interventions.
- The most used crisis management program was by the Crisis Prevention Institute, Inc. (CPI).
- Professional learning experiences were most led by behavior therapist or system administrators.
- Many types of school personnel were involved in professional learning events related to the use of restraint, including school administrators, special education teachers, general education teachers, teaching assistants, school counselors, and school psychologists.
- Typically, 0-20% of staff receive professional learning events related to the use of restraint.

### **Trends in Reported Policy Changes or New Professional Development Opportunities for the Upcoming School Year**

- Many districts are implementing PBIS as a core strategy for behavior management. This includes universal strategies across all tiers (Tier 1, Tier 2, and Tier 3) to address student behaviors proactively.

- Most districts are establishing guidelines to limit physical restraint. Additionally, monitoring committees and documentation procedures have been set up to review incidents of restraint and provide feedback.
- Numerous responses mention the expansion of professional development for staff on topics such as crisis intervention, de-escalation techniques, trauma-informed practices, and behavior management strategies. Training programs are being offered regularly and are mandatory for various staff roles.
- There is a significant emphasis on trauma-informed practices, particularly in understanding the impacts of trauma on student behavior. Many districts are increasing the number of mental health professionals, such as school social workers and school psychologists, to support students and staff.
- The implementation of Multi-Tiered Systems of Support (MTSS) framework is prevalent, focusing on early intervention and providing support at various levels depending on student needs. This includes individualized support through Functional Behavioral Assessments (FBAs) and Behavior Intervention Plans (BIPs).
- Many districts are collaborating with external experts and providing job-embedded training to ensure that staff receive ongoing support in implementing behavior interventions effectively. There is a movement towards using behavioral specialists and instructional coaches to guide staff in best practices.
- Training in non-violent crisis intervention techniques, such as Ukeru and CPI, is being expanded, with specific training sessions scheduled frequently. This approach emphasizes proactive strategies to manage challenging behaviors without physical restraint.
- Some districts are adopting restorative practices as a means to improve student behavior and promote a positive school climate, focusing on repairing harm and building relationships rather than punitive measures.

### **Recommendations for Behavioral Interventions and Professional Learning Experiences**

- Public agencies will encourage staff to attend the MSDE Behavior Intervention Series to encourage the use of positive proactive behavioral interventions and strategies to address challenging student behavior, with a focus on keeping students in the classroom and available for learning.
- Public agencies should increase the frequency of events of professional learning and ensure that professional learning experiences are ongoing throughout the year to reinforce the necessity of positive preventative behavioral interventions.
- Public agencies will break down professional learning events into shorter segments to ensure comprehension and understanding of the material.
- Public agencies should implement training in non-violent de-escalation strategies and alternatives to physical restraint.
- Public agencies will provide professional learning events to all school staff, regardless of title, to ensure continuity and consistency of de-escalation strategies and positive preventative behavioral interventions.

## NONPUBLIC SCHOOLS

For the 2023-2024 school year, there were a total of 3,013 reported physical restraint incidents occurring with 579 students in nonpublic schools. This total is a decrease in the total number of reported physical restraint incidents in nonpublic schools from the 2022-2023 school year (3,332) and the total number of unduplicated students (582). There was a total of 1,103 reported incidents of seclusions occurring with 177 students in nonpublic schools. There was a decrease in the total number of reported seclusion incidents in nonpublic schools from the 2022-2023 school year (1,918) and the total number of unduplicated students (225).

### Trends and Patterns in Behavioral Interventions and Professional Learning Experiences

- Most nonpublic schools reported having three professional learning events related to the use of restraint and/or seclusion.
- These events were typically three hours in length or 6 or more hours in length.
- Nonpublic schools are commonly providing professional learning events in the areas of positive preventative behavioral interventions, crisis intervention, functional behavior assessments, and trauma informed interventions.
- The most commonly used crisis management program was by the Crisis Prevention Institute, Inc. (CPI).
- Professional learning was most often led by a school administrator.
- Many types of school personnel were involved in professional learning events related to the use of restraint, including school administrators, special education teachers, and teaching assistants.
- Typically, 81-100% of staff receive professional learning events related to the use of restraint and/or seclusion.

### Trends in Reported Policy Changes or New Professional Development Opportunities for the Upcoming School Year

- PBIS is frequently cited as the primary behavior management strategy across multiple schools. This approach focuses on reinforcing positive behaviors and implementing proactive strategies to prevent behavioral issues.
- Several responses highlight the use of proactive measures to manage behavior, including trauma-informed practices. Schools are emphasizing understanding students' backgrounds and needs to mitigate crisis situations effectively.
- Many schools have instituted processes for debriefing after incidents that do occur. This includes reviewing behavioral incidents to inform future strategies and support staff in managing challenging behaviors.
- Training initiatives, particularly around PBIS, de-escalation strategies, and behavior management, are prevalent. Schools are prioritizing ongoing professional development to enhance staff skills and ensure consistency in behavioral interventions.

- Responses indicate that many schools have updated their policies to align with regulatory requirements, focusing on documentation, reporting, and intervention processes. Compliance with state guidelines (e.g., COMAR) is frequently mentioned.
- Some schools are collaborating closely with LEAs and families to provide tailored support for students, especially those who might need more intensive interventions.
- There is a trend towards continuous evaluation of student behavior plans and the fidelity of their implementation. Schools are actively reviewing these plans and making necessary adjustments based on student needs.
- The establishment of roles like Behavior Interventionists is noted, indicating a shift toward more specialized support within schools to address student behaviors effectively.
- Concerns regarding staff safety have been highlighted, which has led to a focus on improving staff proficiency in non-coercive de-escalation strategies. Schools are revising policies and enhancing onboarding processes to ensure new staff are well-prepared.
- Some schools are introducing or enhancing Restorative Justice practices as a means to reduce incidents of restraint and promote a positive school climate. This approach aligns with the broader trends of fostering supportive environments for conflict resolution and student accountability.
- There is a trend toward utilizing resources from regional behavioral support teams and engaging with external experts for training and support. Schools are also mentioning collaborative approaches involving social workers and behavioral specialists.
- Many schools are updating their policies to reflect current practices, clarify definitions related to behavior intervention, and align with state regulations. This includes providing clear guidelines on the use of physical restraint and seclusion, along with updated training resources.
- Some responses indicate an interest in using data (e.g., through BIP fidelity checks and behavior incident tracking) to inform practices and improve behavioral interventions.

### **Recommendations for Behavioral Interventions and Professional Learning Experiences**

- Nonpublic schools will encourage staff to attend the MSDE Behavior Intervention Series to encourage the use of positive proactive behavioral interventions and strategies to address challenging student behavior, with a focus on keeping students in the classroom and available for learning.
- Nonpublic schools should implement training in non-violent de-escalation strategies and alternatives to physical restraint and seclusion.
- Nonpublic schools will provide professional learning events to all school staff, regardless of title, to ensure continuity and consistency of de-escalation strategies and positive preventative behavioral interventions.

### **MSDE**

#### **Steps Taken to Ensure Accuracy in Data Collection for the Purpose of this Report**

- MSDE engaged public agencies and nonpublic schools in technical assistance sessions on the data collection tool and supporting manual used for this data collection. MSDE staff provided office hours and individual support sessions to ensure accurate data collection and submission.
- MSDE will incorporate feedback related to the annual collection of restraint and seclusion data into the data collection tool and manual for this collection process moving forward to further ensure accurate data collection.
- MSDE staff has and will continue to provide guidance and problem-solving as it related to the accurate collection of data related to the use of physical restraint and seclusion. Public agency and nonpublic school personnel have been encouraged to reach out to various MSDE staff throughout the year with any problems or concerns related to the collection of restraint and seclusion data.
- MSDE staff added input validations and error notifications to the data collection tool for this year's annual collection. These additional safeguards notified respondents of common errors in their data prior to submission. After submission to MSDE, the data was further validated by MSDE staff in the Division of Assessment, Accountability and Performance Reporting to ensure accuracy.
- A member of MSDE reached out to public agencies and nonpublic schools if there were validation issues or questions regarding their data. Individual support was provided via email and video conferencing to support error correction before final submission of the data.
- MSDE asked public agencies and nonpublic schools to provide signed verification forms after their data was validated to further ensure accuracy in reporting.

### **Recommendations to Increase Positive Behavioral Interventions**

- MSDE held facilitated listening sessions to gather meaningful staff input and public engagement regarding the use of restraint and seclusion. These sessions engaged teachers, related service providers, and paraprofessionals who were involved in the implementation, monitoring, or data collection of restraint. The listening sessions included facilitated small group discussion centered on identifying challenges related to the implementation of new policies and practices pertaining to the use of restraint and seclusion; reviewing best practices for the implementation of proactive behavioral interventions; and identifying additional supports that may be needed to manage student behaviors. These sessions demonstrated the need for more clearly defined behavioral intervention support by MSDE.
- In response to the listening sessions as well as previous discussions and data obtained for prior year's collections, MSDE developed a Behavioral Intervention Series. This training series was offered in the Spring 2024. Due to the extensive interest in the series, MSDE offered the series again in Fall 2024. The overall goal of the series was to drive school-level practices for the improvement of student outcomes by focusing on the use of positive proactive behavioral interventions and strategies to address challenging student behavior, with a focus on keeping students in the classroom and available for learning. Specifically, this six session online training series was designed to assist school staff in strengthening their knowledge of behavioral principles, developing action plans to support the implementation of proactive behavioral interventions, and implementing strategies to address challenging behaviors. Continuing Professional Development (CPD) credit was offered for individuals who took this course, and over 200 school professionals from across the State were awarded CPD for the Spring 2024 session.

- Public agencies and nonpublic schools should establish a crisis team or other support team that can provide ongoing and acute support to schools and classroom staff for students who present with ongoing and significant behaviors. Consultation and coaching provided by these teams should focus on positive prevention behavioral interventions on an individual, classroom, and school-wide level. Specialized instruction may also be provided by these teams. These teams are encouraged to meet weekly to discuss student referrals and preventative strategies at the public agency level.
- Public agencies and nonpublic schools will engage in debriefing sessions or other follow-up sessions after incidents of physical restraint to provide time for all staff involved in the restraint to self-reflect and consider changes that may be made in future situations to avoid the use of physical restraint.

## Appendices

### APPENDIX A: INCIDENT TOTALS

#### Physical Restraints

Tables 34 through 43 present the public agency and nonpublic school totals for physical restraints, disaggregated by disability category, race, ethnicity, gender, age group, educational placement, and LRE placement.

For public agencies, data are suppressed for any student group where the total enrollment for the student group is fewer than 10. For nonpublic schools, data are suppressed for any student group when the total number of incidents for the student group is fewer than 10. Suppressed data will be represented by an asterisk (\*).

**Table 34. Total Number of Physical Restraint Incidents for 2023-2024 by Disability Category**

Table 53. Number of Unduplicated Students Secluded in 2023-2024 by LRE Category

	LRE A <sup>20</sup>	LRE B	LRE C	LRE E	LRE F	LRE G	LRE H	LRE I	LRE J	LRE S	LRE T	LRE U	LRE W	LRE X	LRE Y	LRE Z	Com (ITP)	Other (ITP)
<b>Nonpublic Schools</b>	*	*	*	*	*	169	*	*	*	*	*	*	*	*	*	*	*	*

\*Within each LRE category, the student count is unique. However, students may be counted in more than one LRE.

<sup>19</sup> LRE = least restrictive environment, LRE A = Inside General Education (80% or more), LRE B = Inside General Education (40% - 79%), LRE C =Inside General Education (less than 40%), LRE E = Hospital Placement - services in a medical facility on an in-patient basis, LRE F = Public Separate Day School, LRE G = Private Separate Day School, LRE H = Public Residential Facility, LRE I = Private Residential Facility, LRE J = Home - all services delivered in this setting, LRE S = Separate Class - services are provided in a class with less than 50% nondisabled children, LRE T = Service Provider Location, LRE U = Correctional Facilities, LRE W = Regular 10+ hours/week EC program and receives majority of services in this setting, LRE X = Regular 10+ hours/week EC program and receives services in some other location, LRE Y = Regular EC program <10 hours/week and receives services in this setting, LRE Z = Regular EC program <10 hours/week and receives the majority of services in some other location, ITP = Infants and Toddlers Program, Com = Community
