

# Reducing Over-identification in Special Education (ROSE) Customer Service Q&A

April 6, 2023 – 12:30 PM (EST)

<b>Question</b>	Might it be beneficial for a LEA to partner with a community partner who might be trusted more by parents? Might it be beneficial for a university partner for evaluation to ensure lack of bias? What about under identification of ELL students for Special Education? What about misidentification?
<b>Answer</b>	This is a targeted grant program. There are a lot of areas in education; special education policies to which we can target. It is important to stay within the confines of this program. We are focusing on over identification, and we are and will have a technical partner with the local education agencies as part of this work. We will expect to see the LEAs as part of the work and not expect to see that as part of the application.
