We Begin Early to Finish Strong

The Maryland Infants and Toddlers Program supports young children with developmental delays or disabilities and their families.

FOR MORE INFORMATION AND TO MAKE A REFERRAL, VISIT HTTP://REFERRAL.MDITP.ORG

If you are not ready to make a referral, but would like more information, call 1-800-535-0132
While all children grow and develop at their own rate, some infants and toddlers experience delays in their development, atypical behavior, or have been diagnosed with a special health condition that is likely to lead to non-typical development. The earlier that potential delays and disabilities are identified and early intervention services begin, the better chance a young child has of achieving his or her best potential.

Referrals can be made by anyone for children younger than 36 months who live in Maryland.
