

**Karen B. Salmon, Ph.D.**  
State Superintendent of Schools

---

**TO:** Members of the State Board of Education  
**FROM:** Karen B. Salmon, Ph.D.  
**DATE:** March 26, 2019  
**SUBJECT:** Improving the Teacher Evaluation System

---

**PURPOSE:**

The purpose of this agenda item is to share the status of improvements to the state default model for teacher evaluations.

**BACKGROUND/HISTORICAL PERSPECTIVE:**

Education Reform Act of 2010 and Code of Maryland Regulation (COMAR) 13A.07.09 identify requirements for the evaluation of teachers. All teachers are required to be evaluated annually using either the state evaluation model or an approved locally developed model. Most school systems use a locally developed model for teacher evaluations. Local school systems are only required to use the state evaluation model if the local school system and the exclusive employee representative fail to agree on locally developed model.

The state evaluation model consists of equally weighted measures of professional practice and student growth. Professional practice domains for teachers are planning and preparation; classroom environment; instruction; and professional responsibilities. Student learning objectives (SLOs) are the predominate measure of student growth for teachers. SLOs are informed by assessment data and whole school growth measures.

The adopted regulation established a foundation for the evaluation of teachers in Maryland. However, the regulation failed to define standards, rigor, and claims of evidence of observed instruction as required by state law for the evaluation of teachers. SLOs are the primary measure of student growth for teachers in the adopted regulation. There is increasing [research](#) that suggests SLOs may not provide a valid or accurate measure of a teacher's contribution to student learning. The implementation of the adopted regulation over the last four years resulted in over 95% of teachers being rated effective or highly effective.

**EXECUTIVE SUMMARY:**

In September 2018, an Evaluation Improvement Workgroup was convened to inform improvements to the professional practice domains for teachers and student growth measures for teachers and principals. The workgroup was required to establish recommendations that were grounded in research; informed by data; focused on elevating professional practice and improving student performance; and complied with the requirements established in Education Reform Act of 2010. Workgroup meetings were facilitated by the Mid-Atlantic Comprehensive Center @WestEd and the Regional Educational Laboratories Mid-Atlantic at Mathematica Policy Research.

There was preliminary consensus from the workgroup to recommend adoption of the Danielson Framework for the professional practice domains for the state teacher evaluation system. Workgroup members explored several student growth measures: SLOs, student growth percentiles, and educator impact models. The strengths and limitations for each growth measure were analyzed. There was no consensus by the workgroup on student growth measures and additional information will be collected from stakeholder groups. The Board will also be asked to provide feedback on the student measures (slides 12-14) and percentage assignments in the state Default Evaluation Model (slide 3). Revisions to evaluation regulations will come before the State Board of Education in June 2019.

**ACTION:**

For discussion. No actions required.

# Improving Teacher Evaluations

STATE BOARD MEETING

March 26, 2019

# Overview of Education Reform Act of 2010

## The State Board of Education shall.....

- ✓ adopt regulations that establish general standards for performance evaluations for certificated teachers and principals that include observations, clear standards, rigor, and claims and evidence of observed instruction. Regulations adopted shall include model performance evaluation criteria.
- ✓ solicit information and recommendations from local systems before proposing regulations.

## The Local Board of Education shall....

- ✓ establish performance evaluation criteria based on the general standards adopted by the state board and mutually agreed on by the local school system and the exclusive employee representative.
- ✓ use the model performance evaluation criteria adopted by the state board if the local school system and the exclusive employee representative fail to mutually agree on performance evaluation criteria.

**Current regulation does not have clear standards, rigor, or claims and evidence of observed instruction as required by state law.  
Revised regulations will be brought to the State Board in June.**

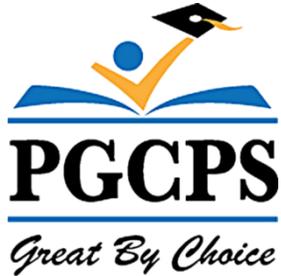

Improving Teacher Evaluations

# Most School Systems Use the Danielson Framework or a Modified Version of the Danielson Framework

Modified Danielson Framework	Danielson Framework	National Board for Professional Teaching Standards	Center for Educational Leadership 5 Dimensions of Teaching and Learning
Allegany	Calvert	Caroline	Worcester
Anne Arundel	Charles	Montgomery	
Baltimore City	Frederick		
Baltimore County	Harford		
Carroll	Howard		
Cecil	Kent		
Dorchester	Prince George's		
Garrett	Queen Anne's		
Talbot	Somerset		
Wicomico	St. Mary's		
	Washington		

# Evaluation Improvement Workgroup Members

# Evaluation Improvement Workgroup

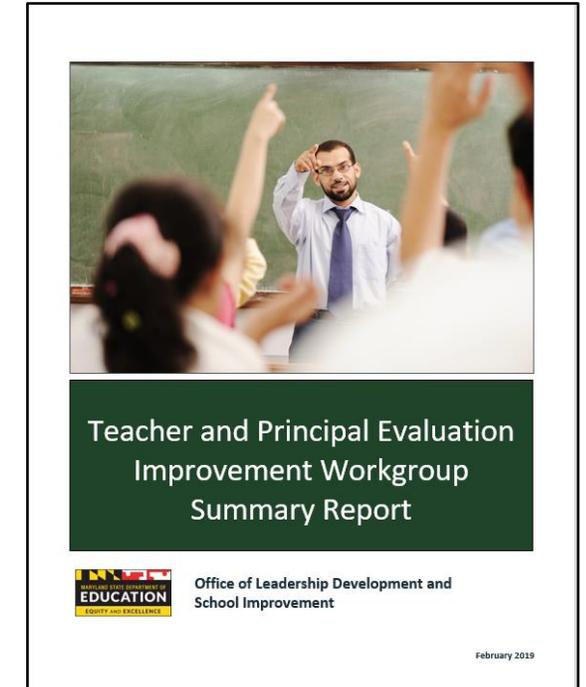

## Workgroup Charge:

Develop recommendations to inform improvements to:

- ✓ Professional Practice Domains for Teacher Evaluations
- ✓ Student Growth Measures for Teachers and Principal

## Recommendation Requirements:

- ✓ Grounded in Research
- ✓ Informed by Data
- ✓ Focused on Elevating Professional Practice and Improving Student Performance
- ✓ Adhere to the Requirements in Education Reform Act of 2010

# Workgroup Members Reviewed Other Commonly Used Frameworks

## 5D+™ Rubric for Instructional Growth and Teacher Evaluation

We know that building the capacity of teachers will lead to better instruction and greater learning for all students. Helping educators understand what good teaching looks like is at the heart of the Center for Educational Leadership's 5D+ Rubric for Instructional Growth and Teacher Evaluation – a growth-oriented tool for improving instruction.

**Dimensions of the 5D+ Rubric for Instructional Growth and Teacher Evaluation**

The 5D+ Rubric for Instructional Growth and Teacher Evaluation is based on the 5 Dimensions of Teaching and Learning™ (5D™) instructional framework, which is derived from an extensive study of research on the core elements that constitute quality instruction. These core elements have been incorporated into the 5D framework and 5D+ Rubric as five dimensions: Purpose, Student Engagement, Curriculum & Pedagogy, Assessment for Student Learning, and Classroom Environment & Culture. The 5D+ Rubric also includes Professional Collaboration and Communication, which is based on activities and relationships that teachers engage in outside of classroom instruction.

**Performance Levels**

Performance levels within each indicator are used to delineate teaching practice, from unsatisfactory to basic, proficient and distinguished. The sophistication of teaching practice and the role of students increase across the levels of performance. The language describing each performance level has been carefully examined by a psychometrician to assure clarity, to avoid the risk of a teacher being rated more than once for similar teaching behavior, and to ensure that each indicator evaluates only one aspect of teaching practice. A careful analysis leads to the determination of the performance level on each indicator.

**Organizational Support**

The 5D+ Rubric for Instructional Growth and Teacher Evaluation is supported by a variety of resources, including a downloadable PDF on the University of Washington Center for Educational Leadership website ([www.cel.uw.edu/5dplus](http://www.cel.uw.edu/5dplus)). You will find materials and a description of how to use the rubric to support your implementation.

**NIET** NATIONAL INSTITUTE FOR INCLUSIVE TEACHERS

# Preliminary Consensus for Danielson Frameworks

## Charlotte Danielson's FRAMEWORK FOR TEACHING

### DOMAIN 1: Planning and Preparation

- 1a **Demonstrating Knowledge of Content and Pedagogy**
  - Content knowledge • Prerequisite relationships • Content pedagogy
- 1b **Demonstrating Knowledge of Students**
  - Child development • Learning process • Special needs
  - Student skills, knowledge, and proficiency
  - Interests and cultural heritage
- 1c **Setting Instructional Outcomes**
  - Value, sequence, and alignment • Clarity • Balance
  - Suitability for diverse learners
- 1d **Demonstrating Knowledge of Resources**
  - For classroom • To extend content knowledge • For students
- 1e **Designing Coherent Instruction**
  - Learning activities • Instructional materials and resources
  - Instructional groups • Lesson and unit structure
- 1f **Designing Student Assessments**
  - Congruence with outcomes • Criteria and standards
  - Formative assessments • Use for planning

### DOMAIN 2: The Classroom Environment

- 2a **Creating an Environment of Respect and Rapport**
  - Teacher interaction with students • Student interaction with students
- 2b **Establishing a Culture for Learning**
  - Importance of content • Expectations for learning and achievement
  - Student pride in work
- 2c **Managing Classroom Procedures**
  - Instructional groups • Transitions
  - Materials and supplies • Non-instructional duties
  - Supervision of volunteers and paraprofessionals
- 2d **Managing Student Behavior**
  - Expectations • Monitoring behavior • Response to misbehavior
- 2e **Organizing Physical Space**
  - Safety and accessibility • Arrangement of furniture and resources

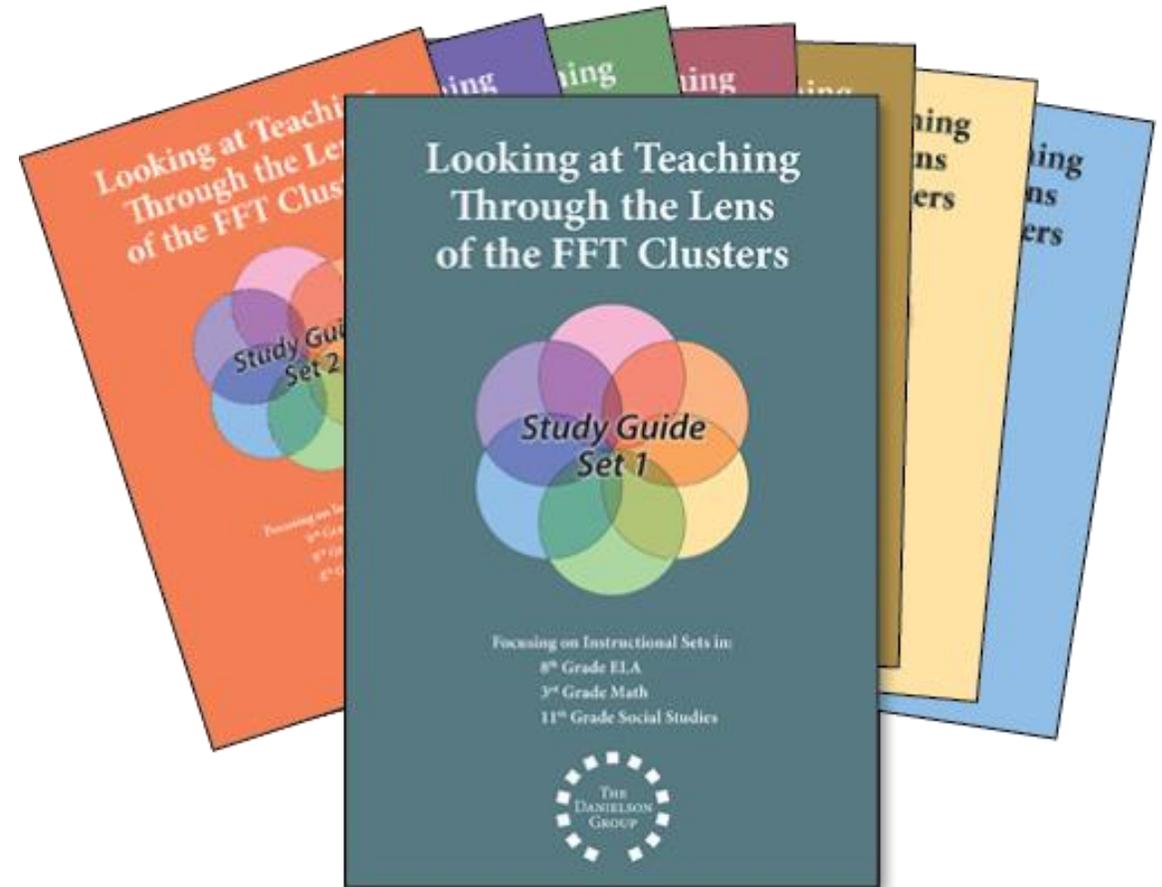

### DOMAIN 4: Professional Responsibilities

- 4a **Reflecting on Teaching**
  - Accuracy • Use in future teaching
- 4b **Maintaining Accurate Records**
  - Student completion of assignments
  - Student progress in learning • Non-instructional records
- 4c **Communicating with Families**
  - About instructional program • About individual students
  - Engagement of families in instructional program
- 4d **Participating in a Professional Community**
  - Relationships with colleagues • Participation in school projects
  - Involvement in culture of professional inquiry • Service to school
- 4e **Growing and Developing Professionally**
  - Enhancement of content knowledge and pedagogical skill
  - Receptivity to feedback from colleagues • Service to the profession
- 4f **Showing Professionalism**
  - Integrity/ethical conduct • Service to students • Advocacy
  - Decision-making • Compliance with school/district regulations

### DOMAIN 3: Instruction

- 3a **Communicating With Students**
  - Expectations for learning • Directions and procedures
  - Explanations of content • Use of oral and written language
- 3b **Using Questioning and Discussion Techniques**
  - Quality of questions • Discussion techniques • Student participation
- 3c **Engaging Students in Learning**
  - Activities and assignments • Student groups
  - Instructional materials and resources • Structure and pacing
- 3d **Using Assessment in Instruction**
  - Assessment criteria • Monitoring of student learning
  - Feedback to students • Student self-assessment and monitoring
- 3e **Demonstrating Flexibility and Responsiveness**
  - Lesson adjustment • Response to students • Persistence

# Danielson Framework Aligns with the National Board for Professional Teaching Core Propositions

National Board for Professional Teaching Core Propositions	Danielson Framework for Teaching
1. Teachers are committed to students and their learning.	Domain 3: Instruction
2. Teachers know the subjects they teach and how to teach those subjects to students.	Domain 1: Planning and Preparation
3. Teachers are responsible for managing and monitoring student learning.	Domain 2: The Classroom Environment
4. Teachers think systematically about their practice and learn from experience.	Domain 4: Professional Responsibilities
5. Teachers are members of learning communities.	Domain 4: Professional Responsibilities

***“An effective system must be aligned with the five core propositions of the National Board for Professional Teaching Standards and include a peer assistance and review model.”*** – Maryland Commission on Innovation & Excellence in Education

# Tiered Approach to Evaluator Training

## Building Awareness

- Unpacking and Applying Standards

## Supporting Implementation

- Calibrating Evaluators
- Collecting Evidence
- Assigning a Summative Rating
- Providing Actionable Feedback

## Monitoring Effectiveness of Implementation

- Reviewing Evaluation Reports
- Conducting Focus Groups

**Training provided to principal supervisors, principals, assistant principals, teachers, and higher education faculty**

# Workgroup Members Reviewed Student Growth Measures

## Considerations for Student Growth Measures

**Validity** – does it measure teaching effectiveness?

**Reliability** – how consistent is the measure across time?

**Coverage** – what share of teachers will have a growth measure?

**Effort** – what is required to create the measure?

**Timeliness** – do growth measures lag evaluations?

**Standardization** – how objective is the measure across contexts?

**Fairness** – is measure correlated to student characteristics?

**Simplicity** – how easy is it to understand/explain the measure?

## Current Student Growth Measure: Student Learning Objectives

Measurable goals set for a specific class, school, group of students, etc.

### Strengths

- Can be used for all teachers.
- Allows teachers to set their own goals for their students.

### Limitations

- Difficult to implement rigorously and consistently.
- Does not account for factors outside of a teachers' control (i.e. student mobility).
- Assessments used to evaluate whether goals are met are not always valid or reliable.
- May not provide a valid or accurate measure of a teacher's contribution to student learning.

## **Student Growth Measure: Educator Impact Models**

Measures how well students progress on outcomes compared with progress of similar students, accounting for factors outside of an educator's control

### **Strengths**

- Accounts for factors outside of a teacher's control.
- Demonstrates student growth toward meeting state standards.
- Valid measure of a teacher's impact on students.

### **Limitations**

- Limited to teachers of state assessed content.
- Lagging evaluation measure.

## **Student Growth Measure: Student Growth Percentiles**

Compares student test scores to scores of students with similar prior test scores

### **Strengths**

- Compares students to their academic peers.
- Demonstrates student growth toward meeting state standards.

### **Limitations**

- Limited to teachers of state assessed content.
- Lagging evaluation measure.
- Less evidence of validity compared to educator impact models.

## Next Steps

- 1. Receive additional input on evaluation system from local school systems and bring recommendations back to State Board.**
- 2. Define student growth measure(s)**
  - What are the measures for student growth?
  - Will student growth continue to be calculated using a separate weight or will student growth be embedded in an adopted framework?
- 3. Train evaluators**
  - Who will be responsible for formally evaluating teachers?
- 4. Align standards for teacher certification and evaluation**

## Summary of Laws and Regulations for Teacher and Principal Evaluations

The table below provides an overview of laws and regulations associated with teacher and principal evaluations.

Law or Regulation	Summary
<p><b>Education Reform Act of 2010</b></p>	<ul style="list-style-type: none"> <li>• Requires annual evaluations for nontenured certificated employees based on established performance evaluation criteria.</li> <li>• Requires the State Board of Education to adopt regulations that establish general standards for performance evaluations for certificated teachers and principals that include observations, clear standards, rigor, and claims and evidence of observed instruction.</li> <li>• Requires the State Board of Education to solicit information and recommendations from local school systems before proposing regulations.</li> <li>• Requires local boards to establish performance evaluation criteria that are mutually agreed upon by local school systems and the exclusive employee representatives for teachers and principals.               <ul style="list-style-type: none"> <li>○ Performance evaluation criteria shall include data on student growth as a significant component of the evaluation and as one of multiple measures.</li> <li>○ Student growth may not be based solely on existing or newly created single examination or assessment.</li> <li>○ No single criterion shall account for more than 35% of the total performance evaluation criteria.</li> <li>○ If the local school system and the exclusive employee representative fail to mutually agree, the model performance evaluation criteria adopted by the State Board shall take effect.</li> </ul> </li> <li>• Defines student growth as student progress assessed by multiple measures and from a clearly articulated baseline to one or more points in time.</li> </ul>

Summary of Laws and Regulations for Teacher and Principal Evaluations

Law or Regulation	Summary
<p>Code of Maryland Regulation (COMAR)13A.07.09.04</p> <p>Local Education Agency Evaluation System</p>	<p>Locally developed evaluation systems must be in mutual agreement with the exclusive employee representatives. The Maryland State Department of Education (MSDE) shall review and approve the evaluation system. The evaluation system shall provide, at a minimum, for an overall rating of highly effective, effective, or ineffective.</p> <p><u>Teacher Evaluation</u></p> <ul style="list-style-type: none"> <li>• Shall include at least five components: planning and preparation; classroom environment; instruction; professional responsibility; and student growth.</li> <li>• Observation of teachers shall be conducted by certificated individuals who have completed training that includes identification of teaching behaviors that result in student growth and the use of the selected standards in the observation.</li> <li>• Observations of professional practice shall be based on at least two observations.</li> <li>• Observations, announced or unannounced, shall be conducted with full knowledge of the teacher.</li> <li>• Student growth must be a significant part of the evaluation.</li> </ul> <p><u>Principal Evaluation</u></p> <ul style="list-style-type: none"> <li>• Shall be based on the outcomes contained in the Maryland Instructional Leadership Framework and in the Interstate Leadership Licensure Consortium.</li> </ul>
<p>COMAR 13A.07.09.05</p> <p>State Default Model</p>	<p>The default model shall be adopted by the school system if the exclusive employee representatives and the school system do not reach agreement on a locally developed evaluation system. The state model requires an equal weighting of professional practice and student growth. Professional practice domains for teachers align with the Charlotte Danielson Framework for Teaching. Professional practice domains for principals align with outcomes in the Maryland Instructional Leadership Framework and Interstate School Leaders and Licensure Consortium Standards.</p>

## Summary of Laws and Regulations for Teacher and Principal Evaluations

Law or Regulation	Summary
COMAR 13A.07.09.06  Evaluation Cycle	All teachers and principals are required to be evaluated annually. Principals and nontenured teachers are evaluated annually on professional practice and student growth. Tenured teachers can be on a three year evaluation cycle. Tenured teachers in year one of this cycle are evaluated on both professional practice and student growth. Tenured teachers in years two and three of the cycle have the option of only being evaluated on student growth.
COMAR 13A.07.09.07  Evaluation Report	Teachers and principals must receive a copy of their evaluation report and acknowledge receipt through signature.
COMAR 13A.07.09.08  Appeal of an Evaluation	If a teacher or principal receives an overall rating of ineffective, the school system shall provide the teacher or principal with the opportunity to appeal in accordance with Education Article §4-205(c)(4).
COMAR 13A.12.04.04  Supervisors of Instruction, Assistant Principals, and Principals	All school administrators must receive training on development, observation, and evaluation of staff as part of their administrator preparation program.

# Chapter 189

(House Bill 1263)

AN ACT concerning

## Education Reform Act of 2010

FOR the purpose of altering the probationary period of employment of a certificated employee in a ~~public~~ local school system; altering certain procedures related to the probationary period of a certificated employee; requiring a county board of education to evaluate annually a nontenured certificated employee based on established performance evaluation criteria; requiring certain certificated employees to be assigned a mentor and provided ~~certain guidance and instruction and~~ additional professional development under certain circumstances; ~~requiring that a performance evaluation of a certificated teacher or principal in a public school system include certain data as a certain component of the evaluation; requiring that a certain component of an evaluation be one of multiple measures; requiring the State Board of Education to adopt regulations to implement certain provisions of this Act; requiring certain classroom teachers and principals working in certain public schools to receive a certain stipend~~ requiring the State Board of Education to adopt regulations ~~establishing~~ *to establish certain standards for effective mentoring; providing that a tenured certificated employee who moves to another local school system in the State shall be tenured in the local school system to which the employee relocates under certain circumstances; authorizing the local school system to which an employee relocates to extend the employee's probationary period under certain circumstances; requiring a county board to establish certain performance evaluation criteria for a certificated teacher or principal under certain conditions; requiring the performance evaluation criteria to include certain measures; requiring the State Board to establish by regulation general standards for teacher and principal performance evaluations, that the performance evaluation criteria include certain measures, and that certain criteria be accounted for in a certain manner; requiring the State Board to establish a certain program to support certain incentives, contingent on the receipt of certain federal funds* *that include certain provisions; requiring certain employees to be tenured under certain circumstances; authorizing certain local school systems to extend a certain probationary period for certain employees under certain circumstances; requiring the State Board to adopt certain regulations that establish general standards for certain performance evaluations, including certain model performance evaluation criteria; requiring the State Board to solicit certain information and recommendations from local school systems before proposing certain regulations and convene a certain meeting; requiring certain county boards to establish certain performance evaluation criteria that are mutually agreed upon by certain local school systems and*

*certains exclusive employee representatives for certain teachers and principals based on certain standards; requiring certain performance evaluation criteria to include certain data as a certain component of the evaluation; requiring that a certain component of an evaluation be one of multiple measures; prohibiting certain performance evaluation criteria from being based solely on certain examinations or assessments; requiring certain model performance evaluation criteria adopted by the State Board to take effect in a local jurisdiction at a certain time under certain circumstances; requiring the State Board to establish a certain program to support certain incentives for certain teachers and principals that meets certain requirements; authorizing the program to include certain incentives; requiring the State Board to adopt certain guidelines to implement a certain program; authorizing the award of certain stipends in certain years to be based on obtainment of National Board Certification; requiring each local school system, on or before a certain date, to submit to the State Board certain information relating to the local system's teacher mentoring program; providing for the construction of certain provisions of this Act; defining a certain term certain terms; providing for the application of a certain provision of this Act; making this Act an emergency measure; and generally relating to the employment of certificated employees in a public local school system.*

BY repealing and reenacting, with amendments,

Article – Education

Section 6–202

Annotated Code of Maryland

(2008 Replacement Volume and 2009 Supplement)

BY adding to

Article – Education

Section 6–306(b)(5)

Annotated Code of Maryland

(2008 Replacement Volume and 2009 Supplement)

SECTION 1. BE IT ENACTED BY THE GENERAL ASSEMBLY OF MARYLAND, That the Laws of Maryland read as follows:

### **Article – Education**

6–202.

(a) (1) On the recommendation of the county superintendent, a county board may suspend or dismiss a teacher, principal, supervisor, assistant superintendent, or other professional assistant for:

(i) Immorality;

(ii) Misconduct in office, including knowingly failing to report suspected child abuse in violation of § 5–704 of the Family Law Article;

(iii) Insubordination;

(iv) Incompetency; or

(v) Willful neglect of duty.

(2) Before removing an individual, the county board shall send the individual a copy of the charges against him and give him an opportunity within 10 days to request a hearing.

(3) If the individual requests a hearing within the 10–day period:

(i) The county board promptly shall hold a hearing, but a hearing may not be set within 10 days after the county board sends the individual a notice of the hearing; and

(ii) The individual shall have an opportunity to be heard before the county board, in person or by counsel, and to bring witnesses to the hearing.

(4) The individual may appeal from the decision of the county board to the State Board.

(5) Notwithstanding any provision of local law, in Baltimore City the suspension and removal of assistant superintendents and higher levels shall be as provided by the personnel system established by the Baltimore City Board of School Commissioners under § 4–311 of this article.

(b) (1) ~~Except as provided in~~ **SUBJECT TO EXCEPT AS PROVIDED IN** paragraph ~~(2)~~ **(3)** of this subsection, the probationary period of employment of a certificated employee in a ~~public~~ **LOCAL** school system shall cover a period of **[2 years]** **3 YEARS** from the date of employment and shall consist of a 1–year employment contract that may be renewed by the county board.

**[(2)** (i) A probationary period for a certificated employee in a public school system may be extended for a third year from the date of employment if the certificated employee does not qualify for tenure at the end of the second year based on established performance evaluation criteria and the employee demonstrates a strong potential for improvement.

(ii) If the probationary period of a certificated employee is extended as provided in this paragraph, a mentor shall be assigned to the employee and the employee shall be evaluated at the end of the third year based on established performance evaluation criteria.]

(2) (I) A COUNTY BOARD SHALL EVALUATE ANNUALLY A NONTENURED CERTIFICATED EMPLOYEE BASED ON ESTABLISHED PERFORMANCE EVALUATION CRITERIA.

(II) ~~IF~~ SUBJECT TO SUBPARAGRAPH (III) OF THIS PARAGRAPH, IF THE NONTENURED CERTIFICATED EMPLOYEE IS NOT ON TRACK TO QUALIFY FOR TENURE AT THE END OF THE FIRST OR SECOND YEAR, A ANY FORMAL EVALUATION POINT:

1. A MENTOR PROMPTLY SHALL BE ASSIGNED TO THE EMPLOYEE TO PROVIDE THE EMPLOYEE COMPREHENSIVE GUIDANCE AND INSTRUCTION; AND ~~AND ADDITIONAL~~

2. ADDITIONAL PROFESSIONAL DEVELOPMENT SHALL BE PROVIDED TO THE EMPLOYEE, AS APPROPRIATE.

(III) NOTHING IN THIS PARAGRAPH SHALL BE CONSTRUED TO PROHIBIT A COUNTY BOARD FROM ASSIGNING A MENTOR AT ANY TIME DURING A NONTENURED CERTIFICATED EMPLOYEE'S EMPLOYMENT.

(3) (I) SUBJECT TO SUBPARAGRAPH (II) OF THIS PARAGRAPH, IF A CERTIFICATED EMPLOYEE HAS ACHIEVED TENURE IN ~~ANY~~ A LOCAL SCHOOL SYSTEM IN THE STATE AND MOVES TO ANOTHER LOCAL SCHOOL SYSTEM IN THE STATE, THAT EMPLOYEE SHALL BE TENURED IF THE EMPLOYEE'S CONTRACT IS RENEWED AFTER 1 YEAR OF PROBATIONARY EMPLOYMENT IN THE LOCAL SCHOOL SYSTEM TO WHICH THE EMPLOYEE RELOCATED IF:

1. THE EMPLOYEE'S FINAL EVALUATION IN THE LOCAL SCHOOL SYSTEM FROM WHICH THE EMPLOYEE DEPARTED IS SATISFACTORY OR BETTER; AND

2. THERE HAS BEEN NO BREAK IN THE EMPLOYEE'S SERVICE BETWEEN THE TWO SYSTEMS OF LONGER THAN 1 YEAR.

(II) A LOCAL SCHOOL SYSTEM MAY EXTEND THE PROBATIONARY PERIOD FOR A CERTIFICATED EMPLOYEE SUBJECT TO SUBPARAGRAPH (I) OF THIS PARAGRAPH FOR A SECOND YEAR FROM THE DATE OF EMPLOYMENT IF:

1. THE EMPLOYEE DOES NOT QUALIFY FOR TENURE AT THE END OF THE FIRST YEAR BASED ON ESTABLISHED PERFORMANCE EVALUATION CRITERIA; AND

**2. THE EMPLOYEE DEMONSTRATES A STRONG POTENTIAL FOR IMPROVEMENT.**

~~(3)~~ **(4) (I)** The State Board shall adopt regulations that implement the provisions of paragraphs (1) and (2) of this subsection and define the scope of a mentoring program **AND PROFESSIONAL DEVELOPMENT** that will be aligned with the [2-year] **3-YEAR** probationary period [and the 1-year extension as provided in paragraph (2) of this subsection].

**(II) THE STATE BOARD SHALL ADOPT REGULATIONS TO ESTABLISH STANDARDS FOR EFFECTIVE MENTORING, INCLUDING PROVISIONS TO ENSURE THAT MENTORS PROVIDE MENTORING THAT IS FOCUSED, OF HIGH QUALITY, AND GEARED TO THE NEEDS OF EACH EMPLOYEE BEING MENTORED:**

- 1. IS FOCUSED;**
- 2. IS SYSTEMATIC;**
- 3. IS ONGOING;**
- 4. IS OF HIGH QUALITY;**
- 5. IS GEARED TO THE NEEDS OF EACH EMPLOYEE BEING MENTORED;**
- 6. INCLUDES OBSERVATIONS; AND**
- 7. INCLUDES FEEDBACK.**

~~(C) (1) A PERFORMANCE EVALUATION OF A CERTIFICATED TEACHER OR PRINCIPAL IN A PUBLIC SCHOOL SYSTEM SHALL INCLUDE DATA ON STUDENT GROWTH AS A SIGNIFICANT COMPONENT OF THE EVALUATION AND ONE OF MULTIPLE MEASURES.~~

~~(2) THE STATE BOARD SHALL ADOPT REGULATIONS THAT IMPLEMENT THE PROVISIONS OF THIS SUBSECTION.~~

**(C) (1) IN THIS SUBSECTION, "STUDENT GROWTH" MEANS STUDENT PROGRESS MEASURED ASSESSED BY MULTIPLE CRITERIA MEASURES AND FROM A CLEARLY ARTICULATED BASELINE TO ONE OR MORE POINTS IN TIME.**

~~(2) SUBJECT TO PARAGRAPHS (3) AND (4) OF THIS SUBSECTION, A COUNTY BOARD SHALL ESTABLISH PERFORMANCE EVALUATION CRITERIA~~

~~FOR CERTIFICATED TEACHERS AND PRINCIPALS IN A LOCAL SCHOOL SYSTEM AFTER MEETING AND CONFERRING WITH THE EXCLUSIVE EMPLOYEE REPRESENTATIVE.~~

~~(3) THE STATE BOARD SHALL ADOPT REGULATIONS THAT ESTABLISH GENERAL STANDARDS FOR PERFORMANCE EVALUATIONS FOR CERTIFICATED TEACHERS AND PRINCIPALS.~~

~~(4) (I) PERFORMANCE EVALUATION CRITERIA FOR A CERTIFICATED TEACHER OR PRINCIPAL IN A LOCAL SCHOOL SYSTEM SHALL INCLUDE MULTIPLE MEASURES.~~

~~(II) STUDENT GROWTH SHALL ACCOUNT FOR 50% OF THE PERFORMANCE EVALUATION CRITERIA.~~

~~(III) NO SINGLE CRITERION SHALL ACCOUNT FOR MORE THAN 35% OF THE TOTAL PERFORMANCE EVALUATION CRITERIA.~~

(2) (I) SUBJECT TO SUBPARAGRAPH (III) OF THIS PARAGRAPH, THE STATE BOARD SHALL ADOPT REGULATIONS THAT ESTABLISH GENERAL STANDARDS FOR PERFORMANCE EVALUATIONS FOR CERTIFICATED TEACHERS AND PRINCIPALS THAT INCLUDE OBSERVATIONS, CLEAR STANDARDS, RIGOR, AND CLAIMS AND EVIDENCE OF OBSERVED INSTRUCTION.

(II) THE REGULATIONS ADOPTED UNDER SUBPARAGRAPH (I) OF THIS PARAGRAPH SHALL INCLUDE MODEL PERFORMANCE EVALUATION CRITERIA.

(III) BEFORE THE PROPOSAL OF THE REGULATIONS REQUIRED UNDER THIS PARAGRAPH, THE STATE BOARD SHALL SOLICIT INFORMATION AND RECOMMENDATIONS FROM EACH LOCAL SCHOOL SYSTEM AND CONVENE A MEETING WHEREIN THIS INFORMATION AND THESE RECOMMENDATIONS ARE DISCUSSED AND CONSIDERED.

(3) SUBJECT TO PARAGRAPH (6) OF THIS SUBSECTION:

(I) A COUNTY BOARD SHALL ESTABLISH PERFORMANCE EVALUATION CRITERIA FOR CERTIFICATED TEACHERS AND PRINCIPALS IN THE LOCAL SCHOOL SYSTEM BASED ON THE GENERAL STANDARDS ADOPTED UNDER PARAGRAPH (2) OF THIS SUBSECTION THAT ARE MUTUALLY AGREED ON BY THE LOCAL SCHOOL SYSTEM AND THE EXCLUSIVE EMPLOYEE REPRESENTATIVE.

(II) NOTHING IN THIS PARAGRAPH SHALL BE CONSTRUED TO REQUIRE MUTUAL AGREEMENT UNDER SUBPARAGRAPH (I) OF THIS PARAGRAPH TO BE GOVERNED BY SUBTITLES 4 AND 5 OF THIS TITLE.

(4) THE PERFORMANCE EVALUATION CRITERIA DEVELOPED UNDER PARAGRAPH (3) OF THIS SUBSECTION:

(I) SHALL INCLUDE DATA ON STUDENT GROWTH AS A SIGNIFICANT COMPONENT OF THE EVALUATION AND AS ONE OF MULTIPLE MEASURES; AND

(II) MAY NOT BE BASED SOLELY ON AN EXISTING OR NEWLY CREATED SINGLE EXAMINATION OR ASSESSMENT.

(5) (I) AN EXISTING OR NEWLY CREATED SINGLE EXAMINATION OR ASSESSMENT MAY BE USED AS ONE OF THE MULTIPLE MEASURES.

(II) NO SINGLE CRITERION SHALL ACCOUNT FOR MORE THAN 35% OF THE TOTAL PERFORMANCE EVALUATION CRITERIA.

(6) IF A LOCAL SCHOOL SYSTEM AND THE EXCLUSIVE EMPLOYEE REPRESENTATIVE FAIL TO MUTUALLY AGREE UNDER PARAGRAPH (3) OF THIS SUBSECTION, THE MODEL PERFORMANCE EVALUATION CRITERIA ADOPTED BY THE STATE BOARD UNDER PARAGRAPH (2)(II) OF THIS SUBSECTION SHALL TAKE EFFECT IN THE LOCAL JURISDICTION 6 MONTHS FOLLOWING THE FINAL ADOPTION OF THE REGULATIONS.

6-306.

~~(b) (5) (i) IN THIS PARAGRAPH, "RACE TO THE TOP APPLICATION" GRANT MEANS THE STATE'S APPLICATION TO THE UNITED STATES DEPARTMENT OF EDUCATION FOR THE RACE TO THE TOP FUND, AUTHORIZED UNDER THE AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009.~~

~~(ii) A HIGHLY EFFECTIVE CLASSROOM TEACHER OR PRINCIPAL WORKING IN A PUBLIC SCHOOL IDENTIFIED IN THE STATE'S RACE TO THE TOP APPLICATION AS A SCHOOL IN THE LOWEST ACHIEVING 5% OF TITLE I SCHOOLS IN IMPROVEMENT, CORRECTIVE ACTION, OR RESTRUCTURING SHALL RECEIVE A STIPEND FROM THE STATE IN AN AMOUNT DETERMINED BY THE STATE BOARD, CONTINGENT ON RECEIPT OF RACE TO THE TOP GRANT FUNDS.~~

~~(H) CONTINGENT ON THE RECEIPT OF RACE TO THE TOP GRANT FUNDS, THE STATE BOARD SHALL ESTABLISH A PROGRAM TO SUPPORT LOCALLY NEGOTIATED INCENTIVES FOR HIGHLY EFFECTIVE CLASSROOM TEACHERS AND PRINCIPALS TO WORK IN PUBLIC SCHOOLS IN IMPROVEMENT, CORRECTIVE ACTION, OR RESTRUCTURING.~~

(I) 1. THE STATE BOARD SHALL ESTABLISH A PROGRAM TO SUPPORT LOCALLY NEGOTIATED INCENTIVES, GOVERNED UNDER SUBTITLES 4 AND 5 OF THIS TITLE, FOR HIGHLY EFFECTIVE CLASSROOM TEACHERS AND PRINCIPALS TO WORK IN PUBLIC SCHOOLS THAT ARE:

A. IN IMPROVEMENT, CORRECTIVE ACTION, OR RESTRUCTURING;

B. CATEGORIZED BY THE LOCAL SCHOOL SYSTEM AS A TITLE I SCHOOL; OR

C. IN THE HIGHEST 25% OF SCHOOLS IN THE STATE BASED ON A RANKING OF THE PERCENTAGE OF STUDENTS WHO RECEIVE FREE AND REDUCED PRICED MEALS.

2. THE PROGRAM ESTABLISHED UNDER SUBSUBPARAGRAPH 1 OF THIS SUBPARAGRAPH MAY INCLUDE FINANCIAL INCENTIVES, LEADERSHIP CHANGES, OR OTHER INCENTIVES.

(II) 1. THE STATE BOARD SHALL ADOPT GUIDELINES TO IMPLEMENT THIS PARAGRAPH.

2. NOTHING IN THIS PARAGRAPH SHALL BE CONSTRUED TO PROHIBIT A LOCAL SCHOOL SYSTEM FROM EMPLOYING MORE STRINGENT STANDARDS THAN THE GUIDELINES ADOPTED UNDER THIS SUBPARAGRAPH.

SECTION 2. AND BE IT FURTHER ENACTED, That during the 2010–2011 and 2011–2012 school years, stipends awarded under § 6–306(b)(5) of the Education Article, as enacted by Section 1 of this Act, may be based on whether the teacher has obtained certification by the National Board for Professional Teaching Standards.

SECTION 3. AND BE IT FURTHER ENACTED, That, on or before December 31, 2010, each local school system shall submit to the State Board of Education a description of the local school system’s teacher mentoring program, including data relating to the number of mentors who have been assigned, the number of teachers to whom the mentors have been assigned, and how, if at all, the effectiveness of the mentoring program is measured.

SECTION ~~2~~ 4. AND BE IT FURTHER ENACTED, That the probationary period of employment specified in § 6-202(b) of the Education Article, as enacted by Section 1 of this Act, shall be applicable to a certificated employee in a ~~public~~ local school system with a date of employment starting on or after July 1, 2010.

SECTION ~~3~~ 5. AND BE IT FURTHER ENACTED, That this Act ~~shall take effect July 1, 2010~~ is an emergency measure, is necessary for the immediate preservation of the public health or safety, has been passed by a yea and nay vote supported by three-fifths of all the members elected to each of the two Houses of the General Assembly, and shall take effect from the date it is enacted.

**Approved by the Governor, May 4, 2010.**

# Teacher and Principal Evaluation Improvement Workgroup Summary Report

**Office of Leadership Development and  
School Improvement**

February 2019

## Teacher and Principal Evaluation Improvement Workgroup Summary Report

### **Maryland State Department of Education**

Karen B. Salmon, Ph.D., State Superintendent of Schools  
Carol A. Williamson, Ed.D., Deputy State Superintendent of Teaching and Learning  
Justin M. Hartings, Ph.D., President, Maryland State Board of Education

#### *Office of Leadership Development and School Improvement*

Tiara Booker-Dwyer, Executive Director  
Edmund Mitzel, Coordinator of Leadership Development  
Dr. Brian Eyer, Leadership Development Specialist  
Dr. Mary Minter, School Leadership and Turnaround Support Specialist  
Dr. Felicia Lanham Tarason, School Leadership and Turnaround Support Specialist  
Laura Liccione, School Leadership and Turnaround Support Specialist  
Dr. Li Wang, Data Analyst for Educator Effectiveness and School Improvement  
Tara Corona, Continuous Improvement Specialist  
Teri Windley, Management Associate  
Hazel Hamond-Terry, Management Associate

Larry Hogan, Governor

Dr. Mary Young	Prince George's County Public Schools

## OVERVIEW AND BACKGROUND

The Maryland State Department of Education is committed to ensuring that each student has effective teachers and educational leaders. Essential to this commitment are valid and reliable evaluation systems. Evaluation systems that accurately differentiate performance levels can inform support required to enhance the professional practice of teachers and school leaders and improve educational outcomes for students.

In 2010, a law ([Education Reform Act of 2010](#)) was enacted that requires the Maryland State Board of Education to adopt regulations that, “...*establish general standards for performance evaluations for certificated teachers and principals that include observations, clear standards, rigor, and claims of evidence of observed instruction.*” In 2012, the Maryland State Board of Education adopted regulations to guide the evaluation of teachers and principals. The regulations consisted of requirements for a state default model ([Code of Maryland Regulation 13a.07.09.05](#)) and a local education agency evaluation system ([Code of Maryland Regulation 13a.07.09.04](#)). The state evaluation model consists of equally weighted measures of professional practice and student growth. The professional practice domains for teachers are planning and preparation, classroom environment, instruction, and professional responsibilities. The professional practice domains for principals were the Maryland Instructional Leadership Framework and Educational Leadership Policy Standards.

The adopted regulations established a foundation for the evaluation of teachers and principals in Maryland. However, these regulations failed to define standards, rigor, and claims of evidence of observed instruction as required by state law for the evaluation of teachers. Student learning objectives (SLOs) are the primary measure of student growth for teachers and principals in the adopted regulations. There are several benefits to using SLOs as growth measures. SLOs can be used with all teachers and they allow teachers to establish their own goals based on the needs of their students. There is increasing [research](#) that suggest SLOs may not provide a valid or accurate measure of a teacher’s contribution to student learning. The implementation of adopted regulations over the last four years resulted in over 95% of teachers and principals being rated effective or highly effective. The inflated evaluation results coupled with the decline in student performance on state assessments drew concern around the reliability and validity of Maryland’s evaluation system.

In February 2017, the Maryland State Board of Education adopted the [Professional Standards for Educational Leaders](#) (PSEL). The PSEL defines the practice of an effective school leader to support the academic success and well-being of each student. These standards replaced the Maryland Instructional Leadership Framework and Educational Leadership Policy Standards. The newly adopted PSEL guide administrator preparation, licensure, and evaluation in Maryland. In July 2018, the Office of Leadership Development and School Improvement in collaboration with the Community Training and Assistance Center (CTAC) and stakeholders developed a [PSEL rubric](#). The Maryland PSEL Rubric builds off the practices identified for an effective leader in the PSEL document by expanding the definition to include practices of highly effective, developing, and ineffective administrators. In October 2018, the Office of Leadership Development and School Improvement released a draft [Principal Evaluation Guidebook](#). This guidebook was designed to support principal supervisors in facilitating the evaluation process. It offers guidance, strategies, templates, and sample evidence that will support effective evaluation practices. The PSEL rubric and guidebook serve as a foundation for principal evaluations in Maryland. The Office of Leadership Development and School Improvement provides training on the PSEL rubric to support effective evaluation practices and improve inter-rater reliability.

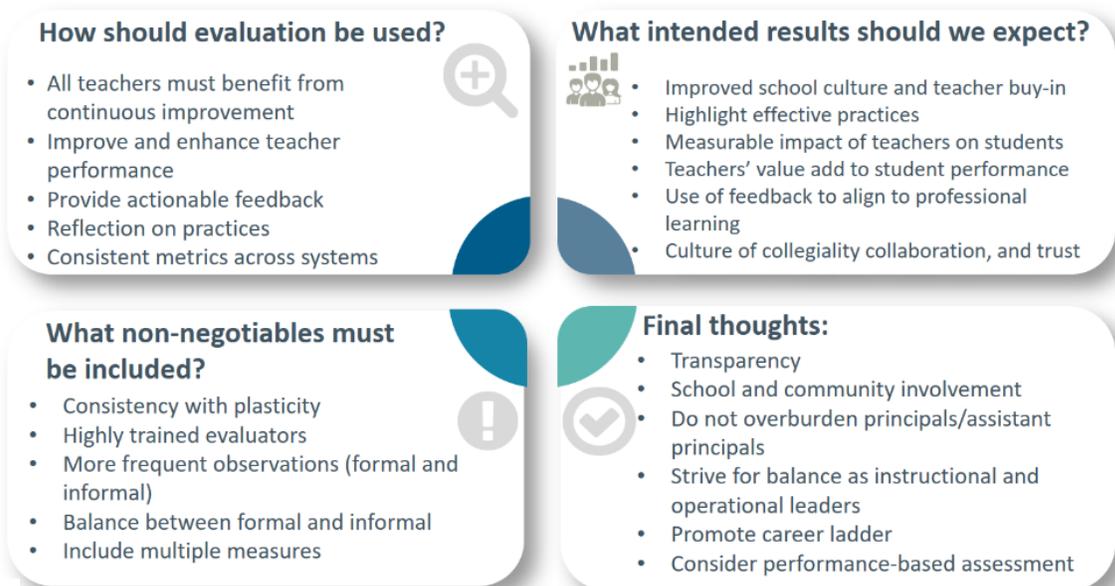

In September 2018, an Evaluation Improvement Workgroup was convened to inform improvements to the evaluation system focusing on the professional practice domains for teachers and student growth measures for teachers and principals. The workgroup was required to establish recommendations that were grounded in research; informed by data; focused on elevating professional practice and improving student performance; and complied with the requirements established in the Education Reform Act of 2010. The recommendations developed by the workgroup will be used to inform revisions to the teacher and principal evaluation system.

This report summarizes evaluation models explored and identifies preliminary recommendations of the workgroup. The recommendations of the workgroup will be shared with stakeholders (representatives from school, school systems, institutions of higher education, etc.) for additional input prior to revising the regulation for the state model.

## REVISING THE EVALUATION SYSTEM

The workgroup began the process for making recommendations to revise the evaluation system by mapping the desired state for teacher evaluations. Figure 1 summarizes the feedback from workgroup members regarding the desired state.

**Figure 1: Desired State for the Teacher Evaluation Model**

## Teacher Professional Practice

The Evaluation Improvement Workgroup (workgroup) analyzed frameworks that were commonly used in states for the evaluation of teachers. The workgroup reviewed the following frameworks to inform recommendations for the teacher professional practice domains:

- [The Framework for Teaching \(Charlotte Danielson Four Domains Model\)](#)
- [The Framework for Teaching Clusters \(Charlotte Danielson\)](#)
- [Classroom Assessment Scoring System \(CLASS\)](#)
- The System for Teacher Advancement (TAP)
- [The Marzano Teacher Evaluation Model](#)

Workgroup members received an overview of the framework, summary of research that supported the framework, and a list of states that currently implement the framework. Members of the workgroup were asked to respond to the following questions for each framework:

1. What resonates with you?
2. How well does this framework capture what teachers should know and be able to do?
3. Are there any gaps?
4. How well does the framework align with the desired state for evaluations?

Each workgroup member was asked to share information about each framework with their constituents to identify a preferred framework. Workgroup members shared feedback at the October 2018 meeting. Each member reported back to the whole group the thoughts and concerns from their representative organizations (refer to [Appendix I](#) for summary of feedback from each workgroup meeting).

There was preliminary consensus to adopt the Danielson Frameworks. There are currently two versions of the Framework for Teaching – the four domains version and the cluster version. There was not a consensus on which version of the framework to adopt.

The rationale for the selection of the Danielson Frameworks was as follows:

1. The Danielson Framework for Teaching is grounded in research and aligned to the Interstate New Teacher Assessment and Support Consortium.
2. The Danielson Framework for Teaching is informed by data which resulted in the updated cluster version.
3. The Danielson Framework for Teaching is rigorous and includes a rubric with four categories of performance (Distinguished, Proficient, Basic, and Unsatisfactory). The clusters version includes rubrics specific to English language arts and mathematics instruction.
4. 21 of the 24 school systems in Maryland are currently using the Danielson Framework or a modified version of the Danielson Framework.

### ***Recommendation for Teacher Professional Practice***

It is being recommended that the state evaluation model include the Danielson Frameworks - four domains and cluster versions - and associated rubrics as measures for teacher professional practice domains.

## Student Growth Measures

The Evaluation Improvement Workgroup was charged to identify student growth measures for teachers and principals. Representatives from the Regional Educational Laboratory at Mathematica Policy Research provided research and evidence of effectiveness for four different student growth measures.

1. Student Learning Objectives (SLOs) - Measure whether educators met established student learning goals for their students.
2. Student Growth Percentiles (SGPs) – Measure how well students progress on outcomes compared with progress of other students who performed similar.
3. Educator Impact – Measures how well students progress on outcomes compared with progress of similar students and accounts for factors outside educators’ control (attendance, prior assessment scores in other subjects, etc).
4. School Wide Measure – Measure connected to overall school performance rating.

A fifth measure was also discussed where local school systems created assessments for each subject area for use in evaluation. The Prince George’s County Public Schools workgroup member shared how this is used in her school system.

For each growth measure, the following characteristics were considered:

- Coverage – what share of teachers can use the growth measure?
- Effort – what is required to create the growth measure?
- Fairness – is the measure correlated to student characteristics?
- Simplicity – how easy is it to understand/explain the measure?
- Validity – does it accurately measure teaching effectiveness?
- Reliability – how consistent is the measure across time?
- Timeliness – are growth measures current data or lagging data?
- Standardization – how objective is the measure across different schools and school systems?

Figure 2 summarizes characteristics for each growth measure discussed in the workgroup.

**Figure 2: Growth Measure Characteristics**

	Student Learning Objectives	Student Growth Percentiles	Educator Impact	School-wide
Coverage	High	Low	Low	High
Effort	High	Low	Low	Low
Fairness	Low	Med	High	Low
Simplicity	Low	Med	Low	Med
Validity	Low	Med	High	Low
Reliability	?	Med	Med	High
Timeliness	High	Low	Low	Low
Standardization	Low	High	High	High

Workgroup members also reviewed strengths and limitations for each growth measure. The review was provided by representatives from the Regional Educational Laboratory at Mathematica Policy Research

and was based on the publication, "[Measuring Progress in the Classroom: How do Different Student Growth Measures Compare? \(Fact Sheet\)](#)" Figure 3 summarizes strengths and limitations discussed in the workgroup.

**Figure 3: Summary of Strength and Limitations for Each Growth Measure**

Content in the table is adapted from: [Measuring Progress in the Classroom: How do Different Student Growth Measures Compare? \(Fact Sheet\)](#)"

Student Growth Measure	Strengths	Limitations
<b>Student Learning Objectives</b>	<ul style="list-style-type: none"> <li>Allows teachers to set their own goals, so may be viewed as more connected to instructional improvement.</li> </ul>	<ul style="list-style-type: none"> <li>May not provide a valid or accurate measure of a teacher’s contribution to student learning.</li> <li>Does not use a statistically rigorous process and may not sufficiently account for factors outside of teachers’ control.</li> <li>Difficult to meaningfully compare performance across teachers.</li> <li>Difficult to implement rigorously and consistently.</li> </ul>
<b>Student Growth Percentiles</b>	<ul style="list-style-type: none"> <li>Accounts for fewer factors outside teachers’ control, which may make the approach conceptually easier to understand than educator impact models.</li> </ul>	<ul style="list-style-type: none"> <li>Less evidence of validity compared to educator impact models.</li> <li>Accounts for fewer factors outside of teachers’ control and could result in less accurate evaluations.</li> <li>Like impact models, student growth percentile models are statistically complex and can be calculated only for teachers of grades and subjects with the requisite student test scores.</li> </ul>
<b>Educator Impact</b>	<ul style="list-style-type: none"> <li>Valid measure of teachers’ impacts on students.</li> </ul>	<ul style="list-style-type: none"> <li>Limited to teachers of grades and subjects with the requisite student test scores.</li> <li>Statistically complex and can be difficult to report or explain clearly to stakeholders.</li> </ul>
<b>District-Designed Assessments</b>	<ul style="list-style-type: none"> <li>Every teacher in every subject would have an accountability measure.</li> <li>Local control is supported.</li> </ul>	<ul style="list-style-type: none"> <li>Time and labor intensive for each school system.</li> <li>Concern regarding validity and reliability of locally made assessments.</li> </ul>

***Recommendation for Student Growth Measure***

The members of the work group reviewed five options for student growth: student growth percentiles, student learning objectives, educator impact model, school-wide measure, and district made assessments. A sixth option was suggested by workgroup members. The sixth option would be to delay identifying a student growth measure until more information is known about the Maryland Comprehensive Assessment Program (MCAP). The overwhelming consensus of the work group was in favor of option six.

### **Student Surveys**

Student surveys are a powerful resource to obtain data that can inform improvements to an educator's professional practice. Some workgroup members wanted to engage in additional discussion around incorporating student surveys as part of the evaluation system. The use of student surveys is optional for school systems. The Maryland State Department of Education will provide information about student surveys so that school systems can make informed decisions about the use of surveys for the purpose of evaluation. [Appendix 2](#) contains information on commonly used student surveys.

## APPENDIX I: MEETING MINUTES

The information below are notes taken during workgroup meetings.

### September 27, 2018 Meeting Minutes

#### Attendees:

- Terry Ball, Maryland Association of Elementary School Principals
- Tiara Booker-Dwyer, MSDE Office of Leadership Development and School Improvement
- Dr. Faith Connolly, Baltimore Education Research Consortium
- Latisha Corey, Maryland Parent Teacher Association (PTA)
- Juliann Dibble, Howard County Public Schools
- Dr. Matthew Duque, MSDE Office of Research
- Geraldine Duval, Maryland State Education Association
- Dr. Bonnie Ennis, Wicomico County Public Schools
- Tom Evans, Maryland Association of Secondary School Principals
- Dr. Brian Eyer, MSDE Office of Leadership Development and School Improvement
- Dr. Laurie Henry, Salisbury University
- Dr. Rhonda Jeter, Bowie State University
- Laura Liccione, MSDE Office of Leadership Development and School Improvement
- Carla McCoy, Baltimore Teachers Union
- Angela Minnici, Mid-Atlantic Comprehensive Center
- Edmund Mitzel, MSDE Office of Leadership Development and School Improvement
- Dr. Christopher Morphew, Johns Hopkins University
- Nancy Reynolds, Maryland Association of Boards of Education
- Jeffery Terziev, Mathematica Policy Research
- Dr. Elias Walsh, Mathematica Policy Research
- Dr. Li Wang, MSDE Office of Leadership Development and School Improvement
- Dr. Mary Young, Prince George's County Public Schools

The Mid-Atlantic Comprehensive Center (MACC) reviewed four [professional practice frameworks](#) for the workgroup to consider. Frameworks included: Danielson Framework for Teaching (Four Domains) and Danielson Framework for Teaching- Six Clusters; CLASS Dimensions; Marzano Teacher Evaluation Model; and TAP Teaching Skills, Knowledge, and Responsibilities Performance Standards. When [workgroup participants](#) were asked to share thoughts on existing and desired state for professional practice frameworks for teacher evaluation, the following ideas were recorded:

- Adopt a state model that allows for local variation.
- Crosswalk state model with National Board Professional Teaching Standards.
- Differentiate evaluations for new versus experienced teachers.
- Locals like to negotiate what is best for their teachers.
- SLOs are overwhelming.
- Teacher preparation needs to be connected to teacher evaluation.
- Evaluations should connect to Kirwan Commission recommendations.
- Consistency is needed across state for evaluations.
- Define “teachers of record.”

## Teacher and Principal Evaluation Improvement Workgroup Summary Report

- Current system is subjective and not a lot of consistency.

### October 25, 2018 Meeting Minutes

#### Attendees:

- Terry Ball, Maryland Association of Elementary School Principals
- Tiara Booker-Dwyer, MSDE Office of Leadership Development and School Improvement
- Cheryl Bost, Maryland State Education Association
- Dr. Faith Connolly, Baltimore Education Research Consortium
- Latisha Corey, Maryland PTA
- Juliann Dibble, Howard County Public Schools
- Dr. Matthew Duque, MSDE Office of Research
- Dr. Bonnie Ennis, Wicomico County Public Schools
- Tom Evans, Maryland Association of Secondary School Principals
- Dr. Brian Eyer, MSDE Office of Leadership Development and School Improvement
- Tracey Fowlkes, Baltimore Teachers Union
- Linda Gill, Public School Superintendents' Association of Maryland
- Dr. Steven Glazerman, Mathematica Policy Research
- Lisa Hopkins, Caroline County Public Schools
- Dr. Rhonda Jeter, Bowie State University
- Laura Liccione, MSDE Office of Leadership Development and School Improvement
- Angela Minnici, Mid-Atlantic Comprehensive Center
- Edmund Mitzel, MSDE Office of Leadership Development and School Improvement
- Dr. Christopher Morphew, Johns Hopkins University
- Janet Pauls, Queen Anne's County Public Schools
- Nancy Reynolds, Maryland Association of Boards of Education
- Dr. Kim Rotruck, Frostburg State University
- Rudy Ruiz, Maryland Business Roundtable for Education
- Dr. Carolyn Teigland, Public School Superintendents' Association of Maryland
- Jeffery Terziev, Mathematica Policy Research
- Dr. Elias Walsh, Mathematica Policy Research
- Dr. Li Wang, MSDE Office of Leadership Development and School Improvement
- Dr. Starlin Weaver, Salisbury University
- Dr. Mary Young, Prince George's County Public Schools

- 1) Workgroup participants were asked to share feedback from their organization as to which professional practices framework to adopt, adapt, or modify. Most (12 of 19) [workgroup participants](#) selected Danielson's Framework for Teaching (the 10 members from MSDE, Mid-Atlantic Comprehensive Center at West Ed, Mathematica Policy Research abstained from the vote).

In general, thoughts on changing a professional practice framework with a new professional practices framework for teachers was concerning. Participants representing educators across the state expressed concern in making a significant change in the professional practice for teacher evaluation while adjusting to meet requirements in the Maryland Every Student Succeeds Act (ESSA) Consolidated Plan.

Teacher and Principal Evaluation Improvement Workgroup Summary Report

- 2) REL Mid-Atlantic at Mathematica Policy Research experts presented three student growth measures for consideration to workgroup participants. Participants examined the State’s current student growth measure- student learning objectives (SLOs) – and discussed advantages and disadvantages in maintaining this measure. Research shared showed reason for re-examination of this student measure:
- Goals differ across teachers, making comparisons difficult.
  - May not fully account for prior skills of students and/or other factors outside of teachers’ control.
  - Burdensome to implement effectively.
  - No evidence of reliability and weak evidence of validity.
  - Unknown as to the connection of student learning objectives making positive impact on student performance.
- 3) The three [student growth measures](#), presented by REL Mid-Atlantic, for consideration included:
- Student Learning Objectives;
  - Student Growth Percentiles; and
  - Education Impact (value-added) model.

For each growth measure, workgroup members discussed what resonates with them and what questions remain. Figure 4 summarizes the discussion of the workgroup.

**Figure 4: Summary of Workgroup Discussion of Student Growth Measures**

Student Learning Objectives		Student Growth Percentiles		Educator Impact (value-added)	
What resonates?	What questions remain?	What resonates?	What questions remain?	What resonates?	What questions remain?
<ul style="list-style-type: none"> <li>▪ Leads to regular conversations</li> <li>▪ SLOs should not create barriers to effective instruction</li> <li>▪ Do not work as well for all student groups</li> </ul>	<ul style="list-style-type: none"> <li>▪ Is this still an option?</li> <li>▪ What replaces it?</li> <li>▪ How do we link student growth to SLOs?</li> </ul>	<ul style="list-style-type: none"> <li>▪ Effective use of data</li> <li>▪ Limitation of model for use with teachers in state-assessed areas</li> <li>▪ State captures all of the data necessary for this model</li> <li>▪ Meets requirements for ESSA accountability indicator</li> <li>▪ Concern over expecting local systems to purchase assessments</li> </ul>	<ul style="list-style-type: none"> <li>▪ If local school systems agree to this measure, what assessments would satisfy this requirement?</li> <li>▪ How does this account for student mobility?</li> <li>▪ How would this work in application for non-tested areas, principals, and teachers?</li> </ul>	<ul style="list-style-type: none"> <li>▪ Single test measure is a plus</li> <li>▪ Factors in student characteristics for which teachers and principals have little control</li> <li>▪ Equity measure (factors such as student attendance, mobility, race, etc.)</li> <li>▪ Considers for gaps in content learning</li> </ul>	<ul style="list-style-type: none"> <li>▪ What about letter grades?</li> <li>▪ How does this relate to teacher evaluation?</li> </ul>

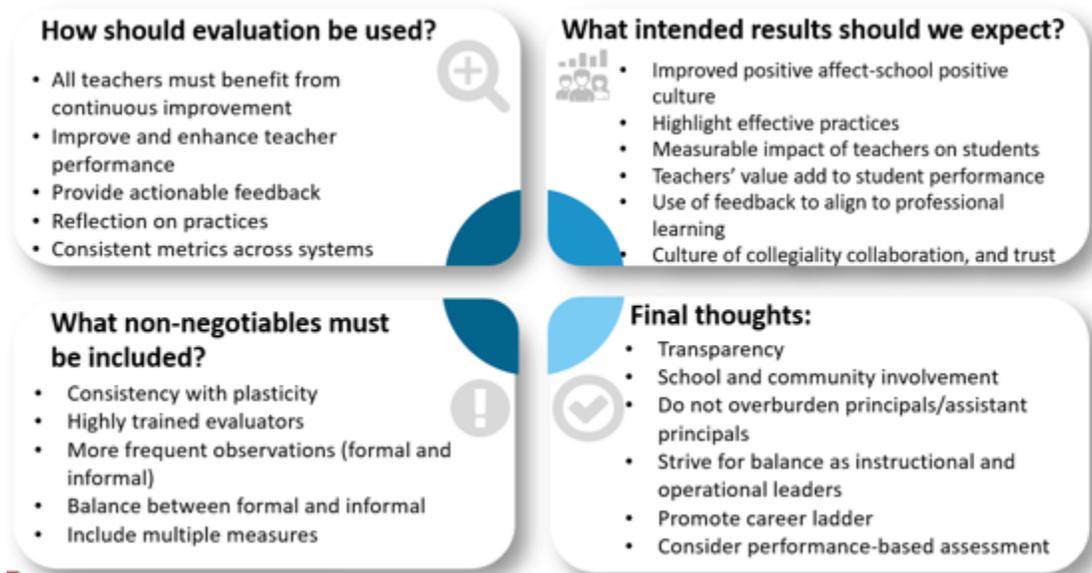

## November 11, 2018 Meeting Minutes

### Attendees:

- Dr. Annette Anderson, Johns Hopkins University
- Terry Ball, Maryland Association of Elementary School Principals
- Tiara Booker-Dwyer, MSDE Office of Leadership Development and School Improvement
- Cheryl Bost, Maryland State Education Association
- Dr. Faith Connolly, Baltimore Education Research Consortium
- Juliann Dibble, Howard County Public Schools
- Dr. Matthew Duque, MSDE Office of Research
- Rick Edwards, Cecil County Public Schools
- Dr. Bonnie Ennis, Wicomico County Public Schools
- Tom Evans, Maryland Association of Secondary School Principals
- Dr. Brian Eyer, MSDE Office of Leadership Development and School Improvement
- Dr. Laurie Henry, Salisbury University
- Lisa Hopkins, Caroline County Public Schools
- Dr. Rhonda Jeter, Bowie State University
- Laura Liccione, MSDE Office of Leadership Development and School Improvement
- Carla McCoy, Baltimore Teachers Union
- Angela Minnici, Mid-Atlantic Comprehensive Center
- Edmund Mitzel, MSDE Office of Leadership Development and School Improvement
- Dr. Gregory Pilewski, Queen Anne's County Public Schools
- Nancy Reynolds, Maryland Association of Boards of Education
- Dr. Kim Rotruck, Frostburg State University
- Jeffery Terziev, Mathematica Policy Research
- Dr. Elias Walsh, Mathematica Policy Research
- Dr. Li Wang, Data Analyst, Office of Leadership Development and School Improvement
- Dr. Mary Young, Prince George's County Public Schools

- 1) Mid-Atlantic Comprehensive Center reviewed the desired state for evaluation for professional practice that was developed from the September 27, 2018 meeting.

**Figure 5: Desired State: Professional Practices for Teachers**

- 2) Workgroup members discussed factors in the desired state for student growth measures.
  - a. How should student growth be measured?
    - Student growth has been compliance based, not aligned to professional practice.
    - A better model would be to embed student growth into professional practice. This would be authentic for teachers and provide evidence to improve professional practice.
    - Teachers need a formative assessment piece. Principals and school leaders should be coming in to have conversations about student growth.
    - The teacher needs to see where they are in relation to a student growth number. What is their contribution to that number?
    - This component should have a predictive nature in order to help teachers move in the same direction.
    - What is this teacher doing for the students in their classroom? Good principals hold teachers accountable for the growth of all their students.
    - Principals must be held accountable for the growth of all the students in their building.
    - Student growth must be measured from start of the school year to May.
    - Student growth must take a multi-dimensional approach.
    - Diagnostic tools are needed to drive daily instruction.
    - How will this process be validated over time and is it reliable?

## Teacher and Principal Evaluation Improvement Workgroup Summary Report

- b. What are the intended results?
    - Minimum of 1 year's growth for all subjects
      - 1. Setting an arbitrary mark is not the answer because it can stifle growth.
      - 2. Some subjects have better growth measures i.e. English, math. Other subjects are variable i.e. art, music, physical education.
      - 3. Social emotional learning influences student growth.
      - 4. Minimum of 1 year of growth should be expected but should not be the ceiling for that child.
    - Use a Plan, Do, Reevaluate model to reflect on practices and make shifts as needed.
    - Growth needs to be realistic and differentiated for student groups. Use of value-added models or student growth percentiles may account for student variation.
    - It is important to keep issues of equity in the forefront when determining student growth outcomes. Is it equitable for all students to achieve the same goal at the same time?
  - c. What are the non-negotiables?
    - Not a standardized test.
    - Use current school data, not lagging data.
    - Locally flexible – not state directed.
    - Every teacher must be able to see individual impact on student growth.
    - Not a single measure.
    - Easy to understand.
    - Must be used for professional growth not for punishment/compliance.
    - Ensuring that there is an alignment with school improvement, district plan and bridge to excellence.
    - Diagnostic tool to guide instruction.
  - d. Final Thoughts/Considerations:
    - There should be an alignment to the star rating system including student growth and achievement scores.
    - Change the law to reflect revisions to student growth model.
    - Establish a vehicle to share best practices from around the country and local school systems.
    - Instructionally focused and authentic.
    - Local context matters.
    - Build complete understanding at all levels of the intention of the student growth models (to improve not remove).
    - What happens when the teacher performance does not improve? What is the process?
- 3) Members from Mathematica Policy Research explained how to compare different student growth measures
- a. Key characteristics of student growth measures were defined.

## Teacher and Principal Evaluation Improvement Workgroup Summary Report

- Coverage – How many teachers can we use this growth measure for?
  - Effort – What is required of school personnel to create this measure?
  - Fairness – Does the measure correlate to student characteristics currently available?
  - Simplicity – Is the score easily understood?
  - Validity – Does it actually measure teacher effectiveness?
  - Reliability – Is the result consistently achieved each time?
  - Timeliness – Is the data current or lagging?
  - Standardization – Is the model implemented with fidelity across all school systems?
- b. Review of Student Growth Percentile – Compare all students who achieved the same baseline score.
  - c. Educator Impact Model - Uses multiple factors to predict the score for the year related to teacher impact.
  - d. Comparing Student Growth Measures using the key characteristics (see figure 6).

**Figure 6: Comparison of Student Growth Models based on the Key Measure Characteristics**

	Student Learning Objectives	Student Growth Percentiles	Educator Impact	School-wide
Coverage	High	Low	Low	High
Effort	High	Low	Low	Low
Fairness	Low	Med	High	Low
Simplicity	Low	Med	Low	Med
Validity	Low	Med	High	Low
Reliability	?	Med	Med	High
Timeliness	High	Low	Low	Low
Standardization	Low	High	High	High

- 4) Workgroup members also discussed school-wide measures and district assessments. Workgroup members were not in favor of school-wide measures because it held teachers accountable for students that they did not teach. Workgroup members were also not in favor of district assessments. This is due to the variability in assessments and the time and resources that it would take to create an assessment for each content area. Workgroup members also felt that this approach would not be fair to teachers of multiple content areas such as elementary school teachers.
- 5) The workgroup members reviewed five options for teacher evaluations. For each option, notable features were reviewed. Workgroup members were asked to analyze characteristics of each model. Refer to the next page for a summary of models reviewed.

Figure 7: Option 1 - Danielson Framework and Student Growth Percentiles

	<b>Notable Features</b>	<b>Characteristics and Factors to Consider:</b>
<b>Professional Practice</b>	<p><b>Relies 100% on <i>Danielson Framework for Teaching: Six Clusters Supporting High Level Learning</i>;</b></p> <ul style="list-style-type: none"> <li>○ Provides a description of planning and instructional skills in promoting high levels of student performance.</li> <li>○ Content-agnostic and covers 100% of PreK-12 teachers.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Coverage</li> <li><input type="checkbox"/> Effort</li> <li><input type="checkbox"/> Fairness</li> <li><input type="checkbox"/> Simplicity</li> <li><input type="checkbox"/> Validity</li> <li><input type="checkbox"/> Reliability</li> <li><input type="checkbox"/> Timeliness</li> <li><input type="checkbox"/> Standardization</li> </ul>
<b>Student Growth</b>	<p><b>Tested and Non-Tested Subject Areas:</b></p> <p><b>Teachers in tested areas:</b></p> <ul style="list-style-type: none"> <li>○ <u>Student growth percentiles</u> attached to evaluation- <b>Coverage ~ 15-20% of teachers;</b></li> <li>- Uses state assessment data for English language arts and mathematics to find student growth percentiles for test grades only (4<sup>th</sup>-8<sup>th</sup> grade).</li> <li>- Lagging data.</li> <li>- Standardized test scores for grades 4-8 only; not high school.</li> </ul> <p><b>Teachers of Non-Tested areas:</b></p> <ul style="list-style-type: none"> <li>○ Student learning objectives scores attached to evaluation- Coverage all teachers.</li> </ul>	

Figure 8: Option 2 - Danielson Framework and District-Designed Assessments

	<b>Notable Features</b>	<b>Characteristics and Factors to Consider:</b>
<b>Professional Practice</b>	<p><b>Relies 100 % on <i>Danielson Framework for Teaching: Six Clusters Supporting High Level Learning</i>;</b></p> <ul style="list-style-type: none"> <li>○ Provides a description of planning and instructional skills in promoting high levels of student performance.</li> <li>○ Content-agnostic and covers 100 % of PreK-12 teachers.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Coverage</li> <li><input type="checkbox"/> Effort</li> <li><input type="checkbox"/> Fairness</li> <li><input type="checkbox"/> Simplicity</li> <li><input type="checkbox"/> Validity</li> <li><input type="checkbox"/> Reliability</li> <li><input type="checkbox"/> Timeliness</li> <li><input type="checkbox"/> Standardization</li> </ul>
<b>Student Growth</b>	<p><b>Cluster 5: Successful Learning by All Students</b></p> <p>Premise: Emphasizes the improving and enhancing of teacher’s professional practices.</p> <ul style="list-style-type: none"> <li>○ <u>Adoption of summative assessments or district-designed</u> aligned to standards and goals to measure learning- no lagging data.</li> <li>○ Allows for continuous and ongoing monitoring and adjustment of student learning, feedback to and from students.</li> <li>○ Assessment becomes integrated into instruction.</li> <li>○ Provides a clear pathway on how students are progressing toward learning goals.</li> <li>○ Content- agnostic; 100 % teachers covered.</li> </ul>	

Figure 9: Option 3 - Danielson Framework and Educator Impact/Value Added Model

	<b>Notable Features</b>	<b>Characteristics and Factors to Consider:</b>
<b>Professional Practice</b>	<p><b>Relies 100 % on Danielson Framework for Teaching: Six Clusters Supporting High Level Learning;</b></p> <ul style="list-style-type: none"> <li>○ Provides a description of planning and instructional skills in promoting high levels of student performance.</li> <li>○ Content-agnostic and covers 100 % of PreK-12 teachers.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Coverage</li> <li><input type="checkbox"/> Effort</li> <li><input type="checkbox"/> Fairness</li> <li><input type="checkbox"/> Simplicity</li> <li><input type="checkbox"/> Validity</li> <li><input type="checkbox"/> Reliability</li> <li><input type="checkbox"/> Timeliness</li> <li><input type="checkbox"/> Standardization</li> </ul>
<b>Student Growth</b>	<p><b>Educator Impact/Value-Added Model</b></p> <p>Premise: Uses a statistical model to account for certain student characteristics outside of teacher control.</p> <ul style="list-style-type: none"> <li>○ Tested area teachers- use of state assessment data- lagging data.</li> <li>○ Characteristics could include:                             <ul style="list-style-type: none"> <li>- student attendance;</li> <li>- English learner status;</li> <li>- Students with disability status; and</li> <li>- Student mobility.</li> </ul> </li> </ul>	

Figure 10: Option 4 - Danielson Framework and Student Learning Objectives

	<b>Notable Features-</b> <b>This option was developed during the Workgroup meeting.</b>	<b>Characteristics and Factors to Consider:</b>
<b>Professional Practice</b>	<p>Adopt Charlotte Danielson’s Framework for Teaching: Six Clusters with the following recommendations:</p> <ul style="list-style-type: none"> <li>○ Districts can adopt a Cluster on a rotating basis each year (i.e., over a three-year evaluation cycle, collaboration between teacher and principal to focus on one Cluster; rotate to a different Cluster the following year)</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Coverage</li> <li><input type="checkbox"/> Effort</li> <li><input type="checkbox"/> Fairness</li> <li><input type="checkbox"/> Simplicity</li> <li><input type="checkbox"/> Validity</li> <li><input type="checkbox"/> Reliability</li> <li><input type="checkbox"/> Timeliness</li> <li><input type="checkbox"/> Standardization</li> </ul>
<b>Student Growth</b>	<p>Recommendations to:</p> <ul style="list-style-type: none"> <li>○ Improve Student Learning Objectives- 100% coverage for teachers;</li> <li>○ Support: resource, technical assistance, and professional learning from district and/or State;</li> <li>○ Identify the measurement of fidelity of implementation of the Student Learning Objective</li> </ul>	

Figure 11: Option 5 – Workgroup Developed Model

## Teacher and Principal Evaluation Improvement Workgroup Summary Report

	<b>Notable Features-</b> <b>This option was developed during the Workgroup meeting.</b>	<b>Characteristics and Factors to Consider:</b>
<b>Professional Practice</b>	Adopt Charlotte Danielson’s Framework for Teaching: Six Clusters with the following recommendations: <ul style="list-style-type: none"> <li>○ Districts can adopt a Cluster on a rotating basis each year (i.e., over a three-year evaluation cycle, collaboration between teacher and principal to focus on one Cluster; rotate to a different Cluster the following year)</li> <li>○ Consider adding the <a href="#">Tripod Survey</a></li> </ul>	<input type="checkbox"/> Coverage <input type="checkbox"/> Effort <input type="checkbox"/> Fairness <input type="checkbox"/> Simplicity <input type="checkbox"/> Validity <input type="checkbox"/> Reliability <input type="checkbox"/> Timeliness <input type="checkbox"/> Standardization
<b>Student Growth</b>	Recommendations to: <ul style="list-style-type: none"> <li>○ Improve Student Learning Objectives- 100% coverage for teachers;</li> <li>○ Support: resource, technical assistance, and professional learning from district and/or State;</li> <li>○ Identify the measurement of fidelity of implementation of the Student Learning Objective</li> </ul>	

Workgroup members were instructed to take the options back to their organizations and collect feedback and suggestions to share at the next meeting.

### February 15, 2019 Meeting Minutes

#### Attendees:

- Terry Ball, Maryland Association of Elementary School Principals
- Tiara Booker-Dwyer, MSDE Office of Leadership Development and School Improvement
- Bridgette Blue Laney, Prince George’s County Public Schools
- Cheryl Bost, Maryland State Education Association
- Dr. Faith Connolly, Baltimore Education Research Consortium
- Juliann Dibble, Howard County Public Schools
- Dr. Matthew Duque, MSDE Office of Research
- Dr. Bonnie Ennis, Wicomico County Public Schools
- Dr. Brian Eyer, MSDE, Office of Leadership Development and School Improvement
- Tom Evans, Maryland Association of Secondary School Principals
- Linda Gill, Public School Superintendents’ Association of Maryland
- Laura Liccione, MSDE Office of Leadership Development and School Improvement
- Carla McCoy, Baltimore Teachers Union
- Angela Minnici, Mid-Atlantic Comprehensive Center
- Edmund Mitzel, MSDE Office of Leadership Development and School Improvement
- Dr. Christopher Mophew, Johns Hopkins University
- Dr. Kristi Murphy, Prince George’s County Public Schools
- Nancy Reynolds, Maryland Association of Boards of Education
- Michael Sedgewick, Maryland PTA
- Dr. Carolyn Teigland, Public School Superintendents’ Association of Maryland
- Jeffery Terziev, Mathematica Policy Research
- Dr. Elias Walsh, Mathematica Policy Research
- Dr. Li Wang, MSDE Office of Leadership Development and School Improvement

## Teacher and Principal Evaluation Improvement Workgroup Summary Report

- Dr. Starlin Weaver, Salisbury University

### 1) Sharing Feedback from Workgroup Members

Workgroup members were asked to share feedback from their organization feedback related to student growth measures presented during the prior meeting. Many participants shared that student learning objectives are not a successful measure of student growth because of the wide range of variability in school systems across the state. Additionally, SLOs require a lot of time and resources to implement them with fidelity. Participants stated their preference is to maintain local control over their evaluation model, especially if they were experiencing any level of success. A common theme arose surrounding the concern that a change in the student growth model would require further training and resources, which would create a hardship among many local school systems. Local school systems would like more time to implement SLOs and to have more training on the development and implementation of SLOs.

### 2) Desired State for Student Growth Measures

The discussion for the desired state of student growth measures emphasized the importance of recognizing the teacher impact on all students with a focus on disadvantaged students in the lowest performing schools. Members of the work group advocated for the need to use multiple measures in the student growth component. Multiple measures will allow for triangulation of data to provide a better picture of teacher performance.

### 3) Purpose of Teacher Evaluations

Workgroup members returned to a discussion of the purposes for teacher evaluation. Members selected different purpose for evaluations and the Mid-Atlantic Comprehensive Center matched the purpose to a growth measure. Figure 12 matches evaluation purpose with a growth measure.

**Figure 12: Evaluation Purpose and Corresponding Growth Measure(s)**

## Teacher and Principal Evaluation Improvement Workgroup Summary Report

Purpose	Growth model	Student Learning Objectives	Classroom Observation	Teacher Self Reports	Student Surveys
1. Find out whether grade-level or instructional teams are meeting specific achievement goals	X	X			
2. Determine whether a teacher's students are meeting achievement gains	X	X			
3. Gather information to provide teachers with guidance related to identified strengths and areas for growth			X		
4. Examine the effectiveness of teachers in lower elementary grades for which no test scores from previous years are available to predict student achievement			X		
5. Determine supports for new teachers			X	X	X
6. Determine whether a new teacher is meeting performance expectations in the classroom			X		X
7. Gather information to determine what professional learning opportunities are needed for individual teachers, instructional teams, grade-level teams, etc.	X	X	X	X	
8. Determine how students perceive a teacher's instructional efforts.					X
9. Determine who would qualify to become a mentor, coach or teacher leader	X	X	X		
10. Gather information on a teacher's ability to work collaboratively with colleagues to evaluate needs of and determine appropriate instruction for at-risk or struggling students			X	X	

**Source:** Adapted from *A Practical Guide to Designing Teacher Evaluation Systems* - <https://gtlcenter.org/sites/default/files/docs/practicalGuideEvalSystems.pdf>

#### 4) Review of Measures for Student Growth

A discussion was facilitated by members of Mathematica Policy Research to provide participants the opportunity to address remaining questions about student growth measures. The team presented excerpts from the [Student Growth Measures Fact Sheet](#).

#### 5) Shown below are the results for the consensus activity for 5 options for student growth (see figure 13).

**Figure 13: Preliminary Recommendations from Workgroup Members for Student Growth Measures**

Option	Professional Practice and Student Growth Measure	Workgroup Recommendations and Comments
1	<ul style="list-style-type: none"> <li>• Danielson Framework</li> <li>• Student Growth Percentile (tested areas)</li> <li>• Student Learning Objective for non-tested subjects</li> </ul>	0 recommendations for this model
2	<ul style="list-style-type: none"> <li>• Danielson Framework</li> <li>• District Made Assessments for all teachers.</li> <li>• Student growth- Student Growth Percentile or educator impact</li> </ul>	0 recommendations for this model
3	<ul style="list-style-type: none"> <li>• Danielson Framework</li> <li>• Educator Impact mode (tested areas) and</li> <li>• SLO for non-tested subjects</li> </ul>	0 recommendations for this model
4	<ul style="list-style-type: none"> <li>• Danielson Framework</li> <li>• SLO for all teachers</li> </ul>	5 recommendations with written comments: <ul style="list-style-type: none"> <li>○ Better implementation of SLOs</li> <li>○ There is no real consensus among the workgroup</li> <li>○ Pause on SLOs</li> <li>○ Pause until Maryland Comprehensive Assessment Program is in place</li> <li>○ Option 1- assessment is changing- SGP- with two different assessments would be suspected and doesn't apply to all teachers</li> <li>○ Option 2- cost prohibitive for districts</li> <li>○ Option 3- too complex for a district to implement</li> <li>○ Option 4- we have already shown that it [SLOs for all] does not work</li> </ul>
5	-Open to suggestions and recommendations from Workgroup	7 recommendations with written comments: <ul style="list-style-type: none"> <li>○ Option 4.1= growth + impact</li> <li>○ With changes in SLO and/or process</li> <li>○ Maintain until clarity is provided [from State]</li> <li>○ Must be reliable and valid assessment</li> <li>○ Pause, at this time, with student achievement until new state assessment is fully developed and available for districts to react</li> <li>○ Develop Danielson and SLO with fidelity</li> <li>○ Maryland State Education Association: corrections and streamlining of SLOs need to occur in many school systems</li> <li>○ Maintain local models with great flexibility</li> <li>○ [SLOs] provide same measure for all subjects/levels</li> <li>○ Keep current language on professional practice domains</li> <li>○ Work to remove [student] growth in law</li> </ul>
Abstain	3 workgroup members abstained	9 members representing MSDE, Mid-Atlantic Comprehensive Center at West Ed, Mathematica Policy Research abstained

## APPENDIX 2: SUMMARY OF STUDENT SURVEYS FOR TEACHER EVALUATION

The table below provides an overview of commonly used student surveys for teacher evaluation. The Maryland State Department of Education does not endorse any particular survey. The list of surveys is supplied for informational purposes only.

Instrument/ Developer	Constructs Assessed	Validity and Reliability Studies <sup>1</sup>	Grade(s) Used	Number of Items <sup>2</sup>	Additional Information
<p><b>1. Tripod survey</b> by Ronald Ferguson <a href="http://tripodproject.org/">http://tripodproject.org/</a></p>	<p>7 Cs of teaching practices</p> <ul style="list-style-type: none"> <li>• Caring</li> <li>• Captivating</li> <li>• Conferring</li> <li>• Controlling</li> <li>• Clarifying</li> <li>• Challenging</li> <li>• Consolidating</li> </ul>	<ul style="list-style-type: none"> <li>• Using data from a teacher teaching multiple classes, student perceptions are consistent across classes (correlations between .58 and .68).</li> <li>• Additionally, perceptions in one class predict to achievement gains in another class.</li> <li>• Each dimension is highly reliable (.80 and above) and consistent across the school year (.70–.85).</li> <li>• Control and challenge dimensions have the highest correlations with value-added measures (Bill &amp; Melinda Gates Foundation, 2010).</li> </ul>	<p>Tailored surveys for Grades K–2, Grades 3–5, and Grades 6–12</p>	<p>36 items<sup>3</sup> in Grades 3–5; 35 items in Grades 6–12</p>	<p>Provides schools, districts, and states with training and support for implementation and analysis. Contact the provider for additional information about cost and implementation.</p>

<sup>1</sup> More rigorous studies should be conducted with all measures reviewed. Many of the validity and reliability studies were not conducted for variations of the tool or across all age ranges for which the developers state the tool is used. Future research should look at how the constructs work across all grades in which the survey is used.

<sup>2</sup> Numbers of items vary depending on the age level. Not all instruments were clear about variations among age levels.

<sup>3</sup> Number of items was not located for the K–2 version.

## Measuring progress in the classroom: How do different student growth measures compare?

Many educator evaluation systems include growth in student achievement among their measures of performance. Student growth measures aim to describe gains in learning among a group of students, such as those in a teacher's class or a school during a school year, based on how much their test scores changed. These measures can be combined with other educator performance measures, such as scores from classroom observations, to help states, districts, and schools identify the highest- and lowest-performing teachers.<sup>i</sup>

## HOW CAN EDUCATION AGENCIES USE STUDENT GROWTH MEASURES?

Education agencies can use the results of student growth measures for several purposes, including helping teachers improve or, in combination with other measures, making consequential personnel decisions about individual teachers. Information gleaned from student growth measures can inform:

Detailed feedback to teachers and principals<sup>ii</sup>

Peer coaching, such as pairing high- and low-performing teachers<sup>iii</sup>

Personnel decisions<sup>iv</sup>

## WHAT ARE SOME CONSIDERATIONS WHEN SELECTING A GROWTH MEASURE?

When choosing the best growth measure, education agencies should consider the following factors, which can affect the fairness, accuracy, and usefulness of a growth measure.

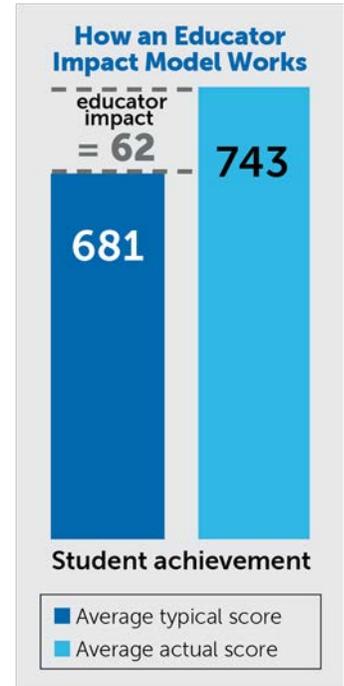

- ❖ *Whether the measure has been validated.* A validated student growth measure has been tested and is known to accurately reflect teachers' impacts on student learning and might therefore be a better tool.
- ❖ *The approach used to calculate growth and the number of factors outside teachers' control the approach accounts for.* Some approaches use a statistically rigorous process to relate students' prior and current test scores. Some also account for other factors, such as additional student background characteristics, that may produce a more valid and reliable (consistent) measure of the progress students make during the school year. However, statistically rigorous approaches accounting for other factors may be conceptually more challenging for teachers to understand.
- ❖ *Whether the measure can be calculated for and used to describe the performance of most teachers.* Growth measures that rely on student test scores from standardized tests can be calculated only for teachers of grades and subjects with the requisite tests.
- ❖ *Whether to use multiple growth measures.* Some states and districts use multiple growth measures, such as one for teachers whose students have test scores and another for teachers whose students do not.
- ❖ *How the growth measure will be used, such as for developmental or evaluative purposes.* Some growth measures, such as those based on end-of-year test scores, are only available at certain points in the year, potentially limiting their uses.

All growth measures can produce imprecise results when based on few students, which means chance or luck may influence the results. Education agencies should consider combining growth measures with other information, especially for consequential decisions.<sup>i</sup> Additionally, the accuracy and usefulness of a growth measure depends on measuring meaningful outcomes for students, such as a standardized test aligned with the curriculum.

## THE MOST COMMONLY USED GROWTH MEASURES AND THEIR TRADE-OFFS

**Educator impact models**, also called value-added models, use a statistical process to distinguish a teacher's impact on the growth in his or her students' test scores from other factors outside the teacher's control. The models commonly account for prior achievement scores and student background characteristics. Using these factors, the models calculate a typical test score for each student based on the performance of other similar students. The models compare the typical score with the student's actual score and attribute the difference to the educator. For each teacher, the differences are averaged across all of the students in the teacher's classes.

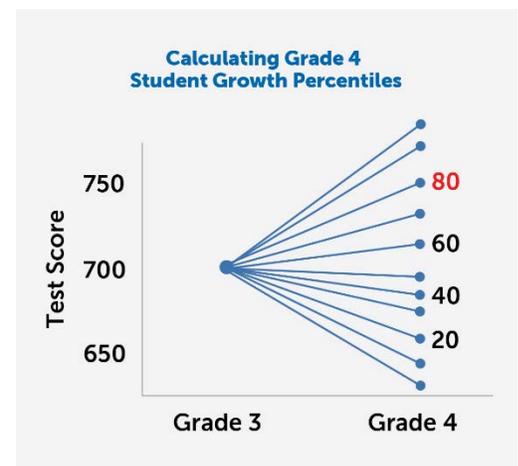

### Strengths and limitations

- + Have been validated as measures of teachers' impacts on students<sup>v</sup>
- Can be calculated only for teachers of grades and subjects with the requisite student test scores
- Are statistically complex and can be difficult to report or explain clearly to stakeholders

**Student growth percentiles** compare the test scores of students with similar prior scores. Using a statistical process, students are ranked according to where they fall in the distribution of students with similar prior scores. For example, a student who scores better than 80 percent of students with similar prior scores is assigned to the 80th percentile. Teachers are assigned a score based on the average or median percentile of their students.

### Strengths and limitations

- + Typically account for fewer factors outside teachers' control, which may make the approach conceptually easier to understand than educator impact models
- Less evidence of validity compared to educator impact models<sup>vi</sup>
- Accounting for fewer factors outside of teachers' control could result in less accurate evaluations
- Like impact models, student growth percentile models are statistically complex and can be calculated only for teachers of grades and subjects with the requisite student test scores

**Student learning objectives** measure teachers' progress toward accomplishing goals the teachers set. The goals might be set with input from the teachers' principals or district staff and can be based on a wide range of measures such as state assessments, district assessments, teacher-developed assessments, and non-assessment outcomes like attendance.

### Strengths and limitations

- + Can be used for all teachers
- + Allows teachers to set their own goals, so may be viewed as more connected to instructional improvement
- Difficult to implement rigorously and consistently
- Difficult to meaningfully compare performance across teachers
- Does not use a statistically rigorous process and may not sufficiently account for factors outside of teachers' control<sup>vii</sup>
- May not provide a valid or accurate measure of a teacher's contribution to student learning<sup>viii</sup>
